Searching for a Quality Child Care Setting for Your Child?

Whether you are seeking care for your cuddly little baby, or your very active preschooler, the child care search can be tough. Every parent is looking for the best program for their child – but how do you choose?

The Race to the Top - Early Learning Challenge Child Care Quality Rating Guide (Guide) was created by the County of Los Angeles to make that process a little easier. The Guide provides objective and reliable information on child care centers and family child care homes. The Race to the Top (RTT) rating process focuses on seven elements/practices that research has shown impacts the quality of care. We hope that the Guide will help you as you weigh your child care options.

In addition to the information provided by the Guide, each parent must also consider how well a specific program will work for their child and their family. A good “fit” will foster the social, emotional and cognitive development of your child and will help you navigate the challenges associated with typical child development.

Why You Can Depend on RTT Child Care Quality Ratings

Programs rated by RTT and featured in this Guide have a history of complying with child care licensing regulations, have volunteered to participate in RTT, and have opened their doors to lengthy and intensive observations. The RTT Reviewers conducting the on-site observations have been rigorously trained by the UCLA Center for Improving Child Care Quality, a premier research organization.

What RTT Quality Ratings Mean

RTT uses a scale of one to five to rate overall program quality. The following is a brief summary of what the different quality levels mean:

Tier 1	Basic Quality Level <i>Complies with licensing regulations</i>	
Tier 2	Fair Quality Level <i>Some components exceed licensing regulations</i>	
Tier 3	Good Quality Level <i>Exceeds licensing regulations in multiple areas</i>	
Tier 4	Advanced Quality Level <i>Consistently meets high program standards</i>	
Tier 5	Excellent Quality Level <i>Consistently meets exemplary standards</i>	

How RTT Quality Ratings Are Calculated

A child care program's overall RTT quality rating is the result of the program's demonstrated ability to meet RTT's quality criteria from each of the following areas:

<p>Child Observations Documents use of evidence-based child assessment / observation tool annually that covers all five domains of development.</p>	
<p>Development and Health Screenings Verifies work with families to ensure screening of all children using a valid and reliable developmental screening tool at entry and as indicated by results thereafter.</p>	
<p>Minimum Qualifications for Lead Teachers/ Family Child Care Home (FCCH) Verifies experience and professional development of lead teacher / FCCH meet Title 22 Regulations.</p>	
<p>Effective Teacher-Child Interactions: CLASS Assessments Confirms familiarity with Classroom Assessment Scoring System (CLASS) for appropriate age group</p>	
<p>Ratios and Group Size Addresses teacher-to-child ratios, group sizes, and interactions.</p>	
<p>Program Environment Rating Scales Confirms familiarity with ERS, use in every classroom as a part of a Quality Improvement Plan, and for appropriate setting.</p>	
<p>Director Qualifications (Centers Only) Verifies management / administration qualifications for Director.</p>	

These seven elements impact the quality of care provided and shape the experiences of each child in the program. (For more information on these criteria, see the Frequently Asked Questions on page 7.) As you look up child care rating results in this Guide, you will find the RTT ratings achieved by the program for each of these elements and the overall quality rating assigned to the program.

Remember – the amount of learning that takes place before your child's fifth birthday is incredible! Children are learning language skills and songs, about their own feelings and the feelings of others, about numbers, letters and books.

High quality programs support the healthy development of your children and help you be your child's champion.

Frequently Asked Questions

1. Do RTT and child care licensing regulations address the same things?

No - RTT and child care licensing regulations do not address the same things.

California's child care licensing regulations are designed to ensure that licensed child care programs "provide a safe and healthy environment for children who are in day care." These regulations articulate the minimum standards needed to keep children safe – they do not address standards for high quality programs.

Licensing requires that all adults working with children in child care programs be fingerprinted, cleared through the Child Abuse Index, and be in good health. These regulations, which most child care centers and family child care homes are legally required to comply with, also address facility issues, teacher to child ratios, and teacher qualifications.

For more information on California's child care licensing regulations, you can visit <http://cclد.ca.gov>.

RTT picks up where licensing ends. RTT provides a framework for child care programs to move from providing "a safe and healthy environment" to one that supports the social, emotional and cognitive development of young children and strengthens their families.

Frequently Asked Questions - Continued

2. *Is “quality child care” really that important for very young children?*

Yes - the quality of child care services is extremely important. During the first three years of life, the architecture of a young child’s brain is being formed. The brains of young children who have nurturing relationships, appropriate levels of stimulation and language rich environments are significantly different from children who do not. What happens during this period has lifelong implications.

3. *I am just starting my child care search. How can I learn about child care and development programs beyond the RTT communities?*

There are seven child care resource and referral agencies serving families in Los Angeles County. To locate the agency serving your community you can:

call **1 (888) 92-CHILD**, or

visit **www.ccala.net**

4. *How can I find out about quality child care programs in my neighborhood?*

The National Association for the Education of Young Children operates an accreditation system for child care centers. Information on accreditation and a listing of accredited programs in Los Angeles County can be found at **www.naeyc.org**.

The National Association for Family Child Care conducts an accreditation system for family child care operators. Information on this accreditation system and a listing of local accredited family child care homes can be found at **www.nafcc.org**.
