Executive Summary

Manatt, Phelps & Phillips, LLP contracted with AECOM Technical Services, Inc. (AECOM) to perform a Phase I Environmental Site Assessment (ESA) of a portion of the Los Angeles County Museum of Art (LACMA) campus located at 5905 Wilshire Boulevard, Los Angeles, California (subject property). This Phase I ESA was performed in general conformance with the scope and limitations of American Standard of Testing Materials (ASTM) Standard Practice Designation E 1527-13 for ESAs. Exceptions to, or deletions from, this practice are described in this report.

The site visit occurred on June 16, 2016. The subject property consists of three non-contiguous parcels of land identified by Assessor Parcel Numbers (APNs) 5508-016-901 (excluding La Brea Tar Pits and Hancock Park), 5089-011-154, and 5086-010-032 (Lots 74, 75, and 76 only), which total approximately 8.8 acres. The subject property contains four adjoining museum buildings (*APN 5508-016-901*), an at-grade asphalt paved parking lot (*APN 5089-011-154*), and an enclosed Metro construction yard [*APN 5086-010-032 (Lots 74, 75, and 76)*]. For the purposes of this report, LACMA West, the La Brea Tar Pits and Hancock Park are not considered subject property. No visual evidence of underground storage tanks (e.g., vent pipes, fill ports), potable water wells, monitoring wells, clarifiers, dry wells, septic tanks, or leach fields was observed during the site visit.

The subject property is bordered to the north by Hancock Park and the La Brea Tar Pits, with residential development beyond. The subject property is bordered to the south by commercial office buildings and residential buildings. The subject property is bordered to the east by Hancock Park and the La Brea Tar Pits, with commercial office buildings beyond. The subject property is bordered to the west by the remainder of the LACMA facility. Gasoline service stations and dry cleaners were not observed in the immediate vicinity (approximately 500 feet) of the subject property. Other off-site sources of concern were not identified in the immediate vicinity.

Two 55-gallon drums containing waste paints were observed in the art conservation/restoration area of the Hammer building. Additionally, waste solvents and solids generated within the laboratories located in the art restoration area are stored in 5- and 20-gallon containers. The wastes are generated from the restoration of art and removed from the site by Thomas Gray & Associates, Inc., a licensed hauler, approximately once a year.

The following is a review of the historical research for each of the subject property parcels:

- *APN 5508-016-901* consisted of vacant, undeveloped land from at least 1923 until the western portion was developed for residential use (residence and greenhouse) sometime prior to 1950. The remainder of the property (east) comprised a portion of Hancock Park. By 1965, the parcel was improved with the existing Ahmanson, Bing and Hammer buildings to be occupied by LACMA. The Art of Americas building was added in 1987. Since that time, the subject property buildings have undergone various additions and renovations.
- *APN 5086-010-032 (Lots 74, 75, and 76)* consisted of vacant, undeveloped land from at least 1923 until sometime prior to 1927 when the southern portion was developed for residential use. By 1928, the northern portion was improved with a multi-tenant commercial structure (715-721 South Ogden Drive). Occupants of the commercial structure included a shoe store and offices. By 1964, the residential and commercial structures had been demolished and the subject property parcel was improved with an asphalt-paved surface parking lot. In 2009,

the subject property parcel was excavated in preparation of the development of a proposed commercial structure. However, the project was never completed and the area was eventually backfilled with imported soil and paved for use as a parking lot. The subject property parcel remains developed as a surface parking lot.

- *APN 5089-011-154* consisted of vacant, undeveloped land from at least 1923 until it was improved with the existing surface parking lot by 1964, with the exception of an apparent oil well and oil cuttings pit located in the northeast portion in 1923 (removed by 1938).

The subject property is identified on the Facility and Manifest Data (HAZNET), Statewide Environmental Evaluation and Planning System (SWEEPS UST), California Facility Inventory Database (CA FID UST), Emissions Inventory Data (EMI), Enforcement Action Listing (ENF), National Pollutant Discharge Elimination System (NPDES), Hazardous Substance Storage Container (HIST UST), and Los Angeles County Street Number List (LOS ANGELES CO. HMS) environmental databases reviewed for this assessment. The HAZNET listing identifies LACMA as a hazardous waste generator for the years 1993 through 2014. Hazardous wastes reportedly generated onsite include photochemicals/photoprocessing waste, unspecified oil-containing waste, unspecified solvent mixture, other organic solids, asbestos containing waste, other inorganic solid wastes, waste oil and mixed oil, paint sludge, liquids with halogenated organic compounds, laboratory waste chemicals, liquids with cyanides greater than or equal to 1,000 milligrams per liter (mg/l), polychlorinated biphenyls (PCBs) and material containing PCBs, off-specification, aged or surplus organics, liquids with mercury greater than or equal to 20 mg/l, aqueous solution with total organic residues 10 percent or more, liquids with pH less than or equal to 2, alkaline solution without metals pH greater than or equal to 12.5, and other unreported wastes. The data in the HAZNET database is extracted from hazardous waste manifests received annually by the Department of Toxic Substances Control (DTSC). This database listing indicates that the waste generated was properly disposed. No violations were identified with respect to the hazardous waste listings. According to the SWEEPS UST, CA FID UST, and HIST UST listings, the subject property was equipped with two 6,000-gallon diesel underground storage tanks (USTs) installed in 1982. Based on historical research and information provided by the User, the USTs were located on the LACMA West campus and not on the subject property. For more information refer to Section 5.1. The EMI listing pertains to permits issued to LACMA by South Coast Air Quality Management District (SCAQMD) in 1987 and 1995. For more information refer to Section 5.5.3. According to the NPDES listing, the subject property is enrolled in the NPDES program for storm water control related to onsite construction activities, and the ENF indicates that LACMA has been issued enforcement notices for failure to provide monthly reports related to the NPDES requirements. Based on the lack of listings in other databases indicating violations and/or a release, it is AECOM's opinion that these listings do not represent an environmental concern for the subject property at this time.

A number of surrounding sites were identified in the environmental database search report. However, the majority of these sites were listed on non-contamination-related databases. Based on AECOM's review and analysis of the database listings, none of the surrounding sites are expected to present a recognized environmental condition (REC) to the subject property, based on their distance (generally greater than 500 feet), regulatory status (i.e. regulatory closure, no violations found), media impacted (soil only), and/or topographical position relative to the subject property (i.e. down-gradient or cross-gradient).

An Environmental Lien Search report, dated May 17, 2016, was provided by Nationwide Environmental Title Research (NETR). No environmental liens or activity use limitations were identified for the subject property.

The following REC was identified during this assessment:

- Aerial photographs indicate an apparent oil well and associated cuttings pit to be located on the subject property in 1923. The oil well and associated cuttings pit appear to have been removed from the subject property by 1938. The potential exists that soils are impacted with heavy-end petroleum hydrocarbons associated with the former cuttings pit, and the former oil well and associated cuttings pit are considered a REC. Furthermore, information pertaining to the abandonment status of the well was not provided in any of the resources reviewed for this report. Proper re-abandonment of the well may be required prior to any redevelopment activities in this portion of the subject property.

No controlled RECs (CRECs) or historical RECs (HRECs) were identified during this assessment. The following Potential Business Risk was identified during this assessment:

- According to the City of Los Angeles Department of City Planning, the subject property is located within an area that has been identified as a Methane Zone by the City of Los Angeles and the California Division of Oil, Gas and Geothermal Resources under Ordinance Number 175790, which took effect in March 2004. There is a potential methane hazard at the site due to its proximity within or adjacent to a known methane gas source (such as a landfill, oil well, oil field, or underground gas storage facility). AECOM recommends that any new construction at the subject property be designed and permitted to the requirements established by the City of Los Angeles Department of Building and Safety for sites located within the Methane Zone.
- Three emergency generators are utilized at the subject property. The generator located within an enclosure to the north of the Ahmanson Building is fueled by an integrated 2,000-gallon steel diesel belly tank within secondary containment. The generator located in the central portion of the Ahmanson Building is fueled by an integrated 10-gallon steel diesel belly tank within secondary containment. The generator located in the southern portion of the Bing Building is fueled by an integrated 30-gallon steel diesel belly tank within secondary containment. A 55-gallon drum containing diesel fuel was observed adjacent to the generator. Additionally, four oil-containing transformers, approximately 50-gallons in size, were observed within the Ahmanson Building and Art of Americas buildings, respectively. No evidence of leaks or staining was observed in the vicinity of the generators, drum, or transformers, with the exception of surficial staining observed in the vicinity of two of the transformers located in the Art of the Americas building. No other tanks were observed at the subject property. Based on the surficial nature of staining and the good condition of the transformers and aboveground storage tanks (ASTs), it is AECOM's opinion that the transformers and ASTs do not represent a significant environmental concern to the subject property. AECOM recommends the removal of the transformers and ASTs to the proper regulatory guidelines prior to any demolition activities.
- During the site visit, approximately six pad-mounted transformers were observed in the subject property buildings. As discussed above, four of the transformers contain oil. The remaining transformers were dry-type. Labeling indicating PCB content was not observed on the transformers. Surficial staining was observed in the vicinity of two of the transformers located in the Art of Americas building. Staining was not observed at the base of the other transformers. Based on the surficial nature, the staining is not expected to represent a

significant environmental concern to the subject property. Ten hydraulic elevators service the subject property buildings. AECOM observed the elevator machine rooms and no leaks or stains were observed on the concrete floors. No other hydraulic equipment (transformers, trash compactors, lifts) was observed on the subject property. The on-site loading docks are manually operated. AECOM recommends the removal of the aforementioned equipment to the proper regulatory guidelines prior to any demolition activities.

The following de minimis conditions (DMCs) were identified during this assessment:

- Naturally occurring tar was observed in vegetated area to the north of the Ahmanson and Hammer buildings. Furthermore, naturally occurring tar was reported in borings during a geotechnical investigation at the subject property in 1984. The naturally occurring tar is considered a *de minimis condition* with respect to the subject property. However, based on the proposed redevelopment of the subject property, it is expected that soils with naturally occurring tar will be encountered during construction activities.

1.0 Introduction

1.1 Purpose

This Phase I Environmental Site Assessment (ESA) was performed pursuant to AECOM Technical Services, Inc. (AECOM's) written proposal, dated May 2016. This assessment was performed in advance of the future redevelopment of the subject property. The purpose of this Phase I ESA is to provide the client with information for use in evaluating recognized environmental conditions (RECs) associated with the subject property.

Per the ASTM standard, potential findings can include RECs, including historical RECs (HRECs), controlled RECs (CRECs), and de minimis conditions. A REC is defined by the ASTM standard as "the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to any release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment." The term includes hazardous substances or petroleum products even under conditions in compliance with laws. HRECs are a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls. CRECs are a recognized environmental condition resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority, with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls. De minimis conditions are those situations that do not present a material risk of harm to public health or the environment and generally would not be subject to enforcement action if brought to the attention of the regulating authority.

This assessment is based on a review of existing conditions, reported pre-existing conditions, and observed operations at the subject property and adjacent properties.

1.2 Scope of Work

The Phase I ESA included a site visit, regulatory research, historical review, and a review and an environmental database analysis of the subject property. In conducting the Phase I ESA, AECOM assessed the subject property for visible signs of possible contamination, researched public records for the subject property and adjacent properties (as applicable), and conducted interviews with persons knowledgeable about the subject property.

This project was performed in general accordance with ASTM Standard Practice Designation E 1527-13 and AECOM's proposal, dated May 17, 2016. Conclusions reached in this report are based upon the assessment performed and are subject to limitations set forth in Sections 1.3, 1.4, and 1.5 below.

1.3 Study Limitations

This report describes the results of AECOM's Phase I ESA to identify the presence of contamination-related liabilities materially affecting the subject facility and/or property. In the conduct of this

assessment, AECOM assessed the presence of such problems within the limits of the established scope of work as described in our proposal.

As with any due diligence assessment, there is a certain degree of dependence upon oral information provided by facility or site representatives, which is not readily verifiable through visual observations or supported by any available written documentation. AECOM shall not be held responsible for conditions or consequences arising from relevant facts that were concealed, withheld, or not fully disclosed by facility or site representatives at the time this assessment was performed. In addition, the findings and opinions expressed in this report are subject to certain conditions and assumptions, which are noted in the report. Any party reviewing the findings of the report must carefully review and consider all such conditions and assumptions.

This report and all field data and notes were gathered and/or prepared by AECOM in accordance with the agreed upon scope of work and generally accepted engineering and scientific practice in effect at the time of AECOM's assessment of the subject property. The statements, findings and opinions contained in this report are only intended to give approximations of the environmental conditions at the subject property.

As specified in the ASTM standard (referred to below as "this practice"), it is incumbent that the client and any other parties who review and rely upon this report understand the following inherent conditions surrounding any Phase I ESA:

- Uncertainty Not Eliminated - No ESA can wholly eliminate uncertainty regarding the potential for REC in connection with a property. Performance of this practice is intended to reduce, but not eliminate, uncertainty regarding the potential for REC in connection with a property, and this practice recognizes reasonable limits of time and costs. (Section 4.5.1 of the ASTM standard)
- Not Exhaustive - "All appropriate inquiry" does not mean an exhaustive assessment of a clean property. There is a point at which the cost of information obtained outweighs the usefulness of the information and, in fact, may be a material detriment to the orderly completion of transactions. One of the purposes of this practice is to identify a balance between the competing goals of limiting the costs and time demands inherent in performing an ESA and the reduction of uncertainty about unknown conditions resulting from additional information. (Section 4.5.2 of the ASTM Standard)
- Comparison with Subsequent Inquiry - ESAs must be evaluated based on the reasonableness of judgments made at the time and under the circumstances in which they were made. Subsequent ESAs should not be considered valid standards to judge the appropriateness of any prior assessment based on hindsight, new information, use of developing technology or analytical techniques, or other factors. (Section 4.5.4 of the ASTM Standard)

A similar set of inherent limitations exist in cases where the Phase I ESA included a screening-level assessment of vapor migration or vapor encroachment; such an assessment is a required part of a Phase I ESA when the ASTM E1527-13 standard is employed. According to the ASTM E2600-10 Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions, the following limitations apply:

- Uncertainty Not Eliminated in Screening - No vapor encroachment screen (VES) can wholly eliminate uncertainty regarding the identifications of vapor encroachment conditions (VECs) in connection with the target property. (Section 4.5.1)

- Not Exhaustive - The guide is not meant to be an exhaustive screening. There is a point at which the cost of information obtained outweighs the usefulness of the information and, in fact, may be a material detriment to the orderly completion of real estate transactions. One of the purposes of this guide is to identify a balance between the competing goals of limiting the costs and time demands inherent in performing a VES and the reduction of uncertainty about unknown conditions resulting from additional information. (Section 4.5.2)
- Comparison with Subsequent Investigations - It should not be concluded or assumed that an investigation was not adequate because the investigation did not identify any VECs in connection with a property. The VES must be evaluated based on the reasonableness of judgments made at the time and under the circumstances in which they were made. Subsequent VESs should not be considered valid bases to judge the appropriateness of any prior screening if based on hindsight, new information, use of developing technology or analytical techniques, or similar factors. (Section 4.5.4)

This report was prepared pursuant to an agreement between Manatt, Phelps & Phillips, LLP on behalf of Museum Associates, doing business as the Los Angeles County Museum of Art (Client) and AECOM and is for the exclusive use of the Client. No other party is entitled to rely on the conclusions, observations, specifications, or data contained herein without first obtaining AECOM's written consent.

The passage of time may result in changes in technology, economic conditions, site variations, or regulatory provisions, which would render the report inaccurate. Reliance on this report after the date of issuance as an accurate representation of current site conditions shall be at the user's sole risk.

1.4 Site-Related Limiting Conditions

The following site-specific limitations were encountered during the course of this assessment:

- It was not feasible to evaluate every individual room or space within the subject property buildings during the site visit. AECOM's evaluation of these buildings focused on areas where hazardous substances are handled. Based on the use of the subject property (office/administrative), this particular site-related limiting condition is not expected to have a significant limitation to this assessment.
- During the site visit, AECOM did not access the portion of the subject property located at APN 5089-011-154 (Lots 74, 75, and 76). The area is reportedly leased and utilized by Metro as a construction staging area for a nearby railway construction project. Based on this information, this particular site-related limiting condition is not expected to have a significant limitation to this assessment.
- During the site visit, AECOM observed two concrete vaults located in central portion (Room 118) of the Ahmanson building (APN 5508-016-901). The purpose and use of the vaults was not identified during the site visit and interviews. The site contact did not report any hazardous materials associated with the vaults. Based on this information, this particular site-related limiting condition is not expected to have a significant limitation to this assessment.
- During the site visit, AECOM did not access Level Two of the Art of Americas building (APN 5508-016-901) as the area was being renovated for a future art exhibition. Based on the use of the area as an art exhibition, this particular site-related limiting condition is not expected to have a significant limitation to this assessment.

1.5 Data Gaps/Data Failure

The following data failure/data gaps were encountered during the course of this assessment:

- As specified in the agreed upon scope of work, a title search was not conducted as part of this ESA. However, based upon historical data collected from other sources, this data gap is not expected to impact the results of this assessment.
- AECOM could not identify all historical occupants of the former commercial structure located at APN 5086-010-032 (Lots 74, 75, and 76) and associated with the addresses 715, 717, 719, and 721 South Ogden Drive. The structure was developed between 1927 and 1928 and had been demolished by 1964. Some historical uses of the structure include a shoe store and offices. In 2009, the subject property at APN 5086-010-032 (Lots 74, 75, and 76) was excavated in preparation of the development of a proposed commercial structure. However, the project was never completed and the area was eventually backfilled with imported soil and paved to be used as a parking lot. Based on the lack of evidence to suggest uses of concern and the excavation and backfilling of soils in the location of the former commercial structure, this data gap is not expected to impact the results of this assessment.
- It should be noted that not all standard historical sources, as defined per ASTM, were reviewed as part of this assessment. In addition to recorded land title records, building department records were not reviewed. Based on information provided from the remaining standard historical sources, additional historical information obtained from building department records would not likely have assisted in meeting the historical use requirement; therefore, this data gap is not expected to impact the results of this assessment.
- Per ASTM, past owners, operators, and occupants of the subject property who are likely to have material information regarding the potential for contamination at the subject property shall be contacted to the extent that they can be identified and that the information likely to be obtained is not duplicative of information already obtained from other sources. AECOM was unable to interview past owners and/or operators at the subject property. However, based upon historical data collected from other sources, this data gap is not expected to impact the results of this assessment.

2.0 Site Description

2.1 Site Location and Parcel Description

The subject property is located at 5905 Wilshire Boulevard, Los Angeles, Los Angeles County, California. Other addresses associated with the subject property include 5864, 5886, 5892, and 5896 Wilshire Boulevard and 716 Spaulding Avenue at APN 5089-011-154 and 715, 717, 717, 719, 723, 729 and 731 South Ogden Drive at APN 5086-010-032 (Lots 74, 75, and 76). The subject property is situated approximately 2-mile north of the 10 Freeway, approximately 725 feet east of the intersection of South Fairfax Avenue and Wilshire Boulevard. The subject property is accessed from Wilshire Boulevard, South Spaulding Avenue, and South Ogden Drive (western property boundary).

According to the Los Angeles Assessor's Office, the subject property consists of three non-contiguous parcels of land identified by Assessor Parcel Numbers (APNs) 5508-016-901 (excluding La Brea Tar Pits and Hancock Park), 5089-011-154, and 5086-010-032 (Lots 74, 75, and 76 only). The approximate location of the subject property is illustrated on Figure 1 - Vicinity Map.

The subject property comprises a portion of the LACMA campus. For the purposes of this report, LACMA West, the La Brea Tar Pits and Hancock Park are not considered subject property. LACMA West is defined as the property bounded by West 6th Street to the north, Wilshire Boulevard to the south, LACMA East to the east, and Fairfax Avenue to the west.

2.2 Site Ownership

According to the Los Angeles Assessor's Records and information provided by NETR, the subject property at APN 5508-016-901 is owned by "County of Los Angeles, State of California, a body politic and corporate", the subject property at APN 5089-011-154 is owned by "Museum Associates doing business as Los Angeles County Museum of Art, a California non-profit public benefit corporation", and the subject property at APN 5086-010-032 (Lots 74, 75, and 76) is owned by "Museum Associates, a California public benefit corporation."

2.3 Site Visit

Ms. Alexandria Wadsworth-Brice with AECOM's Long Beach, California office visited the subject property on June 16, 2016. During the site visit, Ms. Wadsworth-Brice was accompanied through the general office area by Ms. Stephanie Odenheimer (Architecture & Project Management Assistant) and Mr. Christian Balagtas (Security Officer) of LACMA. Ms. Odenheimer and Mr. Balagtas have been associated with the subject property for 1 ½ years and 7 months, respectively. Site-related limiting conditions encountered during this assessment were previously summarized in Section 1.4.

The site visit methodology consisted of walking over accessible areas of the subject property, including the building interior and exterior, the perimeter, and the portions of the surrounding area. The following sections summarize the results of the site visit.

2.3.1 Site and Facility Description

The 8.8-acre subject property contains four adjoining museum buildings located at APN 5508-016-901, an at-grade asphalt paved parking lot at APN 5089-011-154, and an enclosed Metro construction yard at APN 5086-010-032 (Lots 74, 75, and 76).

The adjoining museum buildings are of concrete masonry construction on concrete slab foundation, and consist of the Ahmanson, Bing, Art of Americas, and Hammer buildings. The Ahmanson, Bing and Hammer buildings were constructed in 1963 and The Art of Americas building was constructed in 1987. The combined size of the buildings is 392,871 square feet and buildings comprise a portion of the Los Angeles County Museum of Art (LACMA). The remaining portions of the subject property at APN 5508-016-901 consist of landscaped and concrete paved access ways, and loading areas. AECOM observed evidence of discolored soils in the landscaped areas, consistent with naturally occurring tar located in the surrounding area.

No visual evidence of significant corrosion was observed on the floors or walls of the subject property building or on the exterior of the subject property. The general layout of the subject property is illustrated on Figure 2 - Site Map and Representative Site Photographs are provided in Appendix A.

2.3.2 Surrounding Properties

The subject property is bordered to the north by Hancock Park and the La Brea Tar Pits, with residential development beyond. The subject property is bordered to the south by commercial office buildings and residential buildings. The subject property is bordered to the east by Hancock Park and the La Brea Tar Pits, with commercial office buildings beyond. The subject property is bordered to the west by the remainder of the LACMA facility.

AECOM did not observe any gasoline service stations or dry cleaners in the immediate vicinity (500 feet) of the subject property. In addition, no sensitive receptors (i.e. day care centers, schools, hospitals, water bodies) are located adjacent to the subject property, with the exception of a man-made lake in the La Brea Tar Pits to the west of the subject property. Based on AECOM's site reconnaissance of the surrounding neighborhood, no off-site sources of concern were identified.

2.3.3 Petroleum Products and Hazardous Materials

Small quantities (less than 5-gallons) of gasoline, motor oil and petroleum-based lubricants were observed in a flammables cabinet located within a janitorial supply room on Level 1 of the Ahmanson building. Additionally, paints, solvents, and household cleaning supplies were stored in containers of 5-gallons or less on shelving or in flammables cabinets in the art conservation/restoration area in the north portion of the Hammer building and the wood/paint shop and the loading bay area of the Ahmanson building. No staining was observed on the concrete floor adjacent to the cabinets and containers. Other hazardous materials were not identified by AECOM during the site visit. Chemical inventories provided by LACMA are discussed in Section 5.1.

Naturally occurring tar was observed in vegetated area to the north of the Ahmanson and Hammer buildings, which is considered a *de minimis* condition with respect to the subject property. However, based on the proposed redevelopment of the subject property, it is expected that soils with naturally occurring tar will be encountered during construction activities.

2.3.4 Polychlorinated Biphenyls

Polychlorinated biphenyls (PCB)-containing dielectric fluids have been widely used as coolants and lubricants in transformers, capacitors, and other electric equipment due to their insulating and nonflammable properties. Based on the age of the subject property (pre-1979), the potential exists for PCBs to be present on-site.

During the site visit, approximately six pad-mounted transformers were observed in the subject property buildings. Four of the transformers contain oil. The remaining transformers were dry-type. Labeling indicating PCB content was not observed on the transformers. Surficial staining was observed in the vicinity of two of the transformers located in the Art of Americas building. Staining was not observed at the base of the other transformers. Based on the surficial nature, the staining is not expected to represent a significant environmental concern to the subject property.

Ten hydraulic elevators service the subject property buildings. AECOM observed the elevator machine rooms and no leaks or stains were observed on the concrete floors.

No other hydraulic equipment (transformers, trash compactors, lifts) was observed on the subject property. The on-site loading docks are manually operated.

AECOM recommends the removal of the aforementioned equipment to the proper regulatory guidelines prior to any demolition activities.

2.3.5 Aboveground Storage Tanks

Three emergency generators are utilized at the subject property. The generator located within an enclosure to the north of the Ahmanson Building is fueled by an integrated 2,000-gallon steel diesel belly tank within secondary containment. The generator located in the central portion of the Ahmanson Building is fueled by an integrated 10-gallon steel diesel belly tank within secondary containment. The generator located in the southern portion of the Bing Building is fueled by an integrated 30-gallon steel diesel belly tank within secondary containment. A 55-gallon drum containing diesel fuel was observed adjacent to the generator. Additionally, four oil-containing transformers, approximately 50-gallons in size, were located in the Ahmanson Building and Art of Americas buildings, respectively. No evidence of leaks or staining was observed in the vicinity of the generators, ASTs, drum, or transformer, with the exception of surficial staining observed in the vicinity of two of the transformers located in the Art of the Americas building (see Section 2.3.4). No other tanks were observed at the subject property. Based on the surficial nature of staining and the good condition of the ASTs, it is AECOM's opinion that the ASTs do not represent a significant environmental concern to the subject property. AECOM recommends the removal of the ASTs to the proper regulatory guidelines prior to any demolition activities.

2.3.6 Underground Storage Tanks

Visual evidence of underground storage tanks (USTs) (e.g., vent pipes, fill ports) was not observed during the site visit. Ms. Odenheimer and Mr. Balagtas indicated that no USTs are located on the subject property or have historically been located on the subject property. Former USTs were reportedly removed from LACMA West in 1998. For more information refer to Section 5.1.

2.3.7 Solid Waste

Six solid waste dumpsters and an aboveground grease trap were observed to the north of the Ahmanson building. No evidence of inappropriate disposal activities and no significant staining were observed in the vicinity of the dumpster. The grease trap is reportedly emptied on a monthly basis.

2.3.8 Hazardous Waste

Two 55-gallon drums containing waste paints were observed in the art conservation/restoration area of the Hammer building. Additionally, waste solvents and solids generated within the laboratories located in the art restoration area are stored in 5- and 20-gallon containers. The wastes are generated from the restoration of art and removed from the site by Thomas Gray & Associates, Inc., a licensed hauler, approximately once a year.

2.3.9 Water

The facility receives its potable water supply from the City of Los Angeles water system. No potable water wells were observed at the subject property or reported by the site contact.

2.3.10 Wastewater

Wastewater discharges at the subject property include effluent from human consumptive use, floor drains located in restrooms, kitchen areas, conservation areas, and mechanical rooms, which, according to the site contact, discharge directly to the municipal sanitary sewer system. The site operates two grease interceptors which are used to remove solids and oils from cooking operations from the wastewater prior to entering the sewer system. The interceptors are reportedly emptied on a monthly basis. Staining or visual evidence of a hazardous materials release was not observed in the vicinity of the floor drains.

2.3.11 Stormwater

Stormwater from the subject property appears to drain via sheet flow to the numerous stormwater drains located throughout the paved portions of the subject property. The subject property is connected to the municipal stormwater sewer system. No staining was observed in the vicinity of the storm drains.

2.3.12 Heating and Cooling

The buildings are heated and cooled by forced air-natural gas and water heated ventilation and air conditioning (HVAC) units. The City of Los Angeles provides electricity and Southern California Gas supplies natural gas service for heating to the subject property.

2.3.13 Dumping

No evidence of unauthorized dumping of hazardous substances or petroleum products was observed or reported onsite during the site reconnaissance.

2.3.14 Pits, Ponds, or Lagoons

No pits, ponds, or lagoons associated with hazardous waste disposal were observed or reported onsite during site reconnaissance.

2.3.15 Stained Soil or Pavement

AECOM observed evidence of discolored soils in the landscaped areas which is consistent with naturally occurring tar seepage in the surrounding area. No stained pavement was observed or reported during the site reconnaissance.

2.3.16 Stressed Vegetation

No stressed vegetation was observed or reported onsite during the site reconnaissance.

2.3.17 Onsite Wells

No evidence of potable water wells, monitoring wells, dry wells, septic tanks, or leach fields was observed or reported during the site reconnaissance. Review of the aerial photographs indicates that an oil well was formerly located on the subject property at APN 5089-011-154. For more information refer to Section 5.5.3.

2.3.18 Surrounding Site Observations

At the time of the site visit, no observations of environmental concerns were made on the surrounding sites, including poor housekeeping, bulk chemical storage, or other environmental conditions, which could potentially adversely impact the subject property.

2.4 Non-Scope Considerations

2.4.1 Asbestos

An asbestos survey was not included as part of this Phase I ESA. Based on the date of construction of the structures (1950 and 1965), there is potential for asbestos containing building materials to be present at the site. Building materials were observed to be in good condition. An asbestos survey is recommended prior to any renovation or redevelopment activities.

2.4.2 Lead-Based Paint

A lead-based paint survey was not included as part of this Phase I ESA. Based on the date of construction of the structures (1950 and 1965), there is potential for lead-based paints to be present at the site. Paint surfaces were observed to be in good condition. A lead-based paint survey is recommended prior to any renovation or redevelopment activities.

2.4.3 Radon

AECOM reviewed the United States Environmental Protection Agency (USEPA) Map of Radon Zones in California for information regarding radon concentrations in the subject property area. The map was produced in conjunction with the United States Geological Survey (USGS). The USEPA survey of indoor radon concentrations listed the radon zone level for Los Angeles County, California, as Zone 2. Zone 2 areas are predicted to have an average indoor radon screening potential between 2.0 pCi/l and 4.0 pCi/l for the general area of the subject property. The USEPA

action level for radon is 4.0 pCi/l. Therefore, no further assessment for radon is recommended for the subject property.

2.4.4 Other Concerns

No other environmental concerns were noted or reported during the assessment.

3.0 Environmental Setting

3.1 Topography

According to the United States Geological Survey (USGS) topographic map of the subject property area (Hollywood quadrangle) and a review of the environmental database report provided by Environmental Data Resources (EDR), the elevation of the subject property is approximately 175 feet above mean sea level (msl). Based on a review of these technical resources and AECOM's site visit, the subject property appears to be generally flat with a slight downward slope toward the west.

3.2 Soil/Geology

Site-specific geologic information was not identified during the course of this assessment. According to provided geotechnical reports for the LACMA facility, the subject property is underlain with variable soil types. These soils consist of sandy and silty clays to approximately 5 feet below ground surface (bgs), and include asphaltic soils.

According to geologic information provided in the environmental database report, the bedrock geology of the subject property is of the Cenozoic era, Quaternary system, Quaternary Series.

3.3 Groundwater/Hydrology

Site-specific hydrologic information was not identified during the course of this assessment. Based on the topographic gradient in the area of the subject property, the groundwater flow beneath the subject property and in the surrounding area is anticipated to flow to the west. Groundwater was encountered at approximately 4 feet below ground surface (bgs) during prior geotechnical investigations at the subject property in 1984 (Section 5.1). However, the actual groundwater flow direction and depth in the vicinity of the subject property cannot be determined without site-specific, recent groundwater monitoring well data.

4.0 Site and Area History

Historical information for the subject property and surrounding properties is based on AECOM's review and analysis of the following historical sources:

- Aerial photographs dated 1923, 1928, 1938, 1948, 1952, 1964, 1972, 1977, 1983, 1989, 1994, 2002, 2005, 2009, 2010, and 2012;
- Sanborn maps dated 1926, 1927, 1950, and 1969;
- Topographic maps dated 1894, 1896, 1898, 1900, 1902, 1921, 1924, 1926, 1950/1953, 1966, 1972, 1981, 1991/1994, and 2012;
- City directories for the years 1929, 1933, 1937, 1942, 1951, 1958, 1967, 1971, 1975, 1976, 1980, 1981, 1986, 1990, 1995, 2000, 2006, 2008, and 2013; and

In addition, an interview was conducted with Ms. Stephanie Odenheimer who has been associated with the subject property for the past 1 ½ years and information was obtained from the LACMA website. The EDR historical reports are provided in Appendix C.

4.1 Subject Property

The following is a review of the historical research for each of the subject property parcels:

- *APN 5508-016-901* consisted of vacant, undeveloped land from at least 1923 until developed for residential use (residence and greenhouse) in the west portion sometime prior to 1950. The remainder of the property (east) comprised a portion of Hancock Park. By 1965, the parcel was improved with the existing Ahmanson, Bing and Hammer buildings to be occupied by LACMA. The Art of Americas building was added in 1987. Since that time, the subject property buildings have undergone various additions and renovations.
- *APN 5086-010-032 (Lots 74, 75, and 76)* consisted of vacant, undeveloped land from at least 1923 until developed for residential purpose in the south portion some time prior to 1927. By 1928, the northern portion was improved with a multi-tenant commercial structure (715-721 South Ogden Drive). Occupants of the commercial structure included a shoe store and offices. By 1964, the residential and commercial structures had been demolished and the subject property parcel was improved with an asphalt-paved surface parking lot. In 2009, the subject property parcel was excavated in preparation of the development of a proposed commercial structure. However, the project was never completed and the area was eventually backfilled with imported soil and paved for use as a parking lot. The subject property parcel remains developed as surface parking lot.
- *APN 5089-011-154* consisted of vacant, undeveloped land from at least 1923 until it was improved with the existing surface parking lot by 1964, with the exception of an apparent oil well and oil cuttings pit located in the northeast portion in 1923 (removed by 1938).

Historical research indicates that an oil well was advanced at the subject property at *APN 5089-011-154*. For more information refer to Section 5.5.3.

4.2 Off-site Properties

Surrounding properties appear to have been first developed with residential structures in the early 1920s. By the late 1930s, commercial development had occurred along Wilshire Boulevard, including a gasoline service station at 6000 Wilshire Boulevard on Lot 84 of APN 5086-010-032 (not subject property). No other historical off-site sources of concern were identified.

- Lot 84 of APN 5086-010-032, adjacent to the north of the subject property at APN 5086-010-032 (Lots 74, 75, and 76), was developed with a gasoline service station by at least 1938. The site was redeveloped with a multi-story commercial building by 1964, which had been demolished by 2010. Based on the redevelopment of the site and the lack of evidence of a release, it is AECOM's opinion that the former gasoline service station does not represent an REC to the subject property at this time.

4.3 Previously Prepared Environmental Reports

A previous environmental report prepared for the subject property was provided for AECOM's review during the course of this assessment. A brief summary of the report is presented below. A copy of the prior report is provided in Appendix D.

Phase I Environmental Site Assessment (Work In Progress), Draft Phase I Environmental Site Assessment, LACMA, Phase III Transformation Project, 5905 West Wilshire Boulevard, Los Angeles, not dated. Prepared by Shannon & Wilson, Inc. for LACMA.

According to the provided report, the focus of Shannon & Wilson's assessment included the LACMA East campus (entirety of Parcel 5508-016-901), and the parking lot located at the corner of Spaulding Avenue and Wilshire Boulevard (Parcel 5089-011-154). The use of the property was for museum and associated parking purposes. As the report was a Work In Progress, portions of the report are incomplete and include boilerplate language and/or portions of text highlighted in yellow. AECOM's review of the provided report did not identify any new environmental concerns for the subject property.

5.0 Database and Records Review

5.1 User Provided Information

On June 22, 2016, Ms. Stephanie Odenheimer, architect with LACMA, provided AECOM with responses to the ASTM 1527-13 User Questionnaire which summarized her knowledge of title records, environmental liens, specialized knowledge, and/or real estate value reduction issues associated with the subject property. Ms. Odenheimer was not aware of any environmental liens or activity use limitations having been placed on the subject property. Ms. Odenheimer indicated that a gas station was located at the north corner of 6th Street and Fairfax Avenue (not subject property) and she is aware of methane and tar to be present at the site. Based on the distance of the former gas station from the subject property (excess of 500 feet), it is AECOM's opinion that the gas station does not represent an environmental concern to the subject property.

Ms. Odenheimer provided several documents and reports for the LACMA facility, which includes but is not limited to the subject property. Salient points of the provided documentation are summarized below with respect to the subject property:

A grading permit, dated December 1, 2009, for the backfilling and grading of the subject property at *APN 5508-010-032*. The area was reportedly excavated in 2009 in preparation of the development of a proposed commercial structure by previous owners. However, the project was never completed and the area was backfilled with imported soil and paved to be used as a parking lot.

The documentation included geotechnical investigations by LeRoy Crandall and Associates in 1984 performed prior to additions to the subject property buildings. The geotechnical investigations consisted of the advancement of borings to depths ranging from 36 to 50 feet below ground surface (bgs). Groundwater was encountered at 4 feet bgs and naturally occurring "asphalt-type material" (or tar) was encountered in soils between 5 and 15 feet bgs. Naturally occurring tar was also observed during AECOM's site visit (see Section 2.3.3.). Gaseous odors were also noted as a result of the tar. According to the provided documentation, the subject property is equipped with a methane mitigation system consisting of gas detection systems throughout the existing buildings. Methane mitigation measures will likely be required for future redevelopments.

A notice of non-compliance was issued to Museum Association Corp in 1998 for maintaining underground storage tanks (USTs) in the City of Los Angeles without a valid Los Angeles Fire Department (LAFD) permit. The permit identifies the USTs to be located at 6067 Wilshire Boulevard, an address associated with LACMA West (not subject property). A no further action letter issued by and dated December 21, 1998, is also included in the documentation. According to the letter, the tanks were removed as documented in the Tank Removal Report, dated November 3, 1998, by The Tyree Organization, Ltd (TTO). However, AECOM has not been provided the final TTO report. Based on the reported location of the USTs at LACMA West and the no further action letter issued by LAFD, the USTs are not considered a REC for the subject property.

Ms. Allison Akbaroff, Chemical Hygiene Officer at LACMA, provided inventories of the chemicals utilized in onsite art conservation and restoration operations. According to the inventories, the chemicals include various cleaners, polishes, conditioners, resins, paints, emulsions, epoxies, glues, waxes, hardeners, and dyes. Based on the proper handling and disposal practices observed and

documented, the relatively small quantity of chemicals used in these operations (5-gallons or less), and the lack of evidence of a release, these chemicals are not considered a REC for the subject property.

5.2 Title Records/Environmental Liens

Per the agreed upon scope of work, a chain-of-title report was not performed as part of this assessment. An Environmental Lien Search report, dated June 16, 2016, was provided by NETR. No environmental liens or activity use limitations were identified for the subject property. A copy of the NETR Environmental Lien Search Report is included as Appendix E.

5.3 Database Information

In accordance with the scope of work and ASTM Standard E-1527-13, a search of various governmental databases was conducted by EDR. The site-specific environmental database report was reviewed to evaluate if soil and or groundwater from an on-site and/or off-site sources of concern has the potential to impact the subject property. The database abbreviations are provided in the site-specific environmental database report.

The database report includes various reports detailing database information for each of the sites identified/geocoded within the specified radius. Additional sites were identified within the database report; however EDR was not able to map them to specific locations due to insufficient/contradicting address information. These sites were included in the database report as "orphan" sites. Based upon AECOM's review, there does not appear to be any significant concerns associated with any of the orphan sites. A summary of AECOM's review and analysis of the site-specific environmental database report is presented below. A copy of the EDR Database Report is provided in Appendix B.

Based on AECOM's research, the subject property is not located on or within a 1-mile radius of tribal lands.

5.3.1 Subject Property

The subject property is identified on the Facility and Manifest Data (HAZNET), Statewide Environmental Evaluation and Planning System (SWEEPS UST), California Facility Inventory Database (CA FID UST), Emissions Inventory Data (EMI), Enforcement Action Listing (ENF), National Pollutant Discharge Elimination System (NPDES), Hazardous Substance Storage Container (HIST UST), and Los Angeles County Street Number List (LOS ANGELES CO. HMS) environmental databases reviewed for this assessment. The HAZNET listing identifies LACMA as a hazardous waste generator for the years 1993 through 2014. Hazardous wastes reportedly generated onsite include photochemicals/photoprocessing waste, unspecified oil-containing waste, unspecified solvent mixture, other organic solids, asbestos containing waste, other inorganic solid wastes, waste oil and mixed oil, paint sludge, liquids with halogenated organic compounds, laboratory waste chemicals, liquids with cyanides greater than or equal to 1,000 milligrams per liter (mg/l), polychlorinated biphenyls (PCBs) and material containing PCBs, off-specification, aged or surplus organics, liquids with mercury greater than or equal to 20 mg/l, aqueous solution with total organic residues 10 percent or more, liquids with pH less than or equal to 2, alkaline solution without metals pH greater than or equal to 12.5, and other unreported wastes. The data in the HAZNET database is extracted from hazardous waste manifests received annually by the Department of Toxic Substances Control (DTSC). This database listing indicates that the waste generated was properly disposed. No violations were identified with respect to the hazardous waste listings. According to the SWEEPS UST, CA FID UST, and HIST UST listings, the LACMA

facility was equipped with two 6,000-gallon diesel underground storage tanks (USTs) installed in 1982. Based on historical research and information provided by the User, the USTs were located on the LACMA West campus and not the subject property. For more information refer to Section 5.1. The EMI listing pertains to permits issued to LACMA by South Coast Air Quality Management District (SCAQMD) in 1987 and 1995. For more information refer to Section 5.5.3. According to the NPDES listing, the subject property is enrolled in the NPDES program for storm water control related to onsite construction activities, and the ENF indicates that LACMA has been issued enforcement notices for failure to provide monthly reports related to the NPDES requirements. Based on the lack of listings in other databases indicating violations and/or a release, it is AECOM's opinion that these listings do not represent an environmental concern for the subject property at this time.

5.3.2 Surrounding Sites

According to the environmental database report, numerous sites (over 20) were identified within their respective ASTM and/or EDR search distances from the subject property. Based on AECOM's review of these database listings, none of these sites are expected to present a REC to the subject property based on their distance from the subject property, regulatory status (i.e. closed, no violations found), media impacted (i.e. soil only), and/or topographical position from the subject property (i.e. down-gradient or cross-gradient). Due to its proximity to the subject property, the following site is discussed in additional detail.

- **George C Page Museum (B6)** located at 5801 Wilshire Boulevard is located in Hancock Park, adjacent to the east of subject property at *APN 5508-016-901*. This site is listed on the RCRA-SQG, FINDS, and Enforcement and Compliance History Online (ECHO) databases. According to the site-specific environmental database report, this site was registered as a small quantity generator of hazardous wastes in 1996 and no violations were found. Based on the lack of violations or evidence of a release, it is AECOM's opinion that these listings do not represent a REC to the subject property at this time.
- **Mobile Cleaners (C7)** located at 5900 Wilshire Boulevard is located adjacent to the south of the subject property at *APN 5508-016-901*, across Wilshire Boulevard, and adjacent to the west of the subject property at *APN 5089-011-154*, across South Spaulding Avenue. This site is listed on the EDR Cleaners proprietary database. According to the site-specific environmental database report, this site was occupied by Mobile Cleaners in 2001. No permits for dry cleaning equipment were identified for the site on South Coast Air Quality Management District (SCAQMD) Facility Information Detail (FIND) database. Based on the lack of violations or evidence of a release, it is AECOM's opinion that these listings do not represent a REC to the subject property at this time.
- **5900 Wilshire Blvd Building / The Shorenstein Co (C8, C9, and C12)** located at 5900 Wilshire Boulevard is located adjacent to the south of the subject property at *APN 5508-016-901*, across Wilshire Boulevard, and adjacent to the west of the subject property at *APN 5089-011-154*, across South Spaulding Avenue. The site is listed on the HIST UST, SWEEPS UST, EMI, PROC, and RCRA-LQG databases. According to the UST listings, the site was equipped with a 10,000-gallon gasoline UST and 8,000-gallon gasoline UST. Additionally, the EMI listing indicates that the site was issued permits for air emissions equipment in 1990 and 1995. The RCRA-LQG listing identifies the site as a large quantity generator of hazardous wastes, registered in 1990, and no violations were found. The PROC listing identifies the site as a certified processor site. Based on the lack of violations or

evidence of a release, it is AECOM's opinion that these listings do not represent a REC to the subject property at this time.

- **D D B Needham Worldwide Inc (C13)** located at 5900 Wilshire Boulevard is located adjacent to the south of the subject property at *APN 5508-016-901*, across Wilshire Boulevard, and adjacent to the west of the subject property at *APN 5089-011-154*, across South Spaulding Avenue. The site is listed on the RCRA-SQG, FINDS, HAZNET, and ECHO databases. According to the site-specific environmental database report, the site was registered as a small quantity generator of hazardous wastes in 1992 and no violations were found. Hazardous wastes reportedly generated onsite include photochemicals/photoprocessing waste in 1993 and 1995. Based on the lack of violations or evidence of a release, it is AECOM's opinion that these listings do not represent a REC to the subject property at this time.

5.4 Vapor Encroachment Screening

AECOM conducted a Tier 1 vapor encroachment screening (VES) as part of this assessment. This screening was conducted in general accordance with the ASTM E2600 *Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions* dated June 2010. The objective of the VES was to evaluate the following:

1. A vapor encroachment condition (VEC) exists, or
2. Is likely to exist, or
3. Cannot be ruled out, or
4. Can be ruled out because it does not exist or is not likely to exist.

To meet this objective, AECOM reviewed listings for the subject property and surrounding area in the EDR Database Report to evaluate the potential for vapors from known or suspected releases to have migrated to the subsurface of the subject property.

5.4.1 Subject Property

No on-site sources of vapor encroachment (e.g. UST, contaminated soil, groundwater plume, etc) were identified during this assessment.

5.4.2 Off-site

To conduct the VES of the nearby area, AECOM conducted a detailed review and analysis of the site-specific environmental database report with particular focus on the follow two types of sites:

1. Off-site properties that are impacted by chlorinated volatile organic compounds (VOCs) and/or semi-volatile-organic compounds (SVOCs) and are located within approximately 1,750 feet of the subject property, and
2. Off-site properties that are impacted by petroleum hydrocarbons and are located within approximately 525 feet of the subject property.

The following paragraph summarizes the results of AECOM's VES of the nearby area.

A review of the site-specific environmental database indicates that no chlorinated VOC/SVOC and 2 petroleum hydrocarbon impacted sites are located with the above-described radii of the subject property. However, the petroleum hydrocarbon-impacted sites can be ruled out due to their

regulatory status (i.e. regulatory closure has been issued), media impacted (i.e. soil only), and/or topographical position from the subject property (i.e. down-gradient or cross-gradient). Based on this information, it is AECOM's opinion that a VEC at the subject property can be ruled out because it does not exist or is not likely to exist.

5.5 Agency File Review

5.5.1 Local

AECOM submitted public records requests to the City of Los Angeles Fire Department (LAFD) Hazardous Materials Division (LAFD HazMat), LAFD Central Industrial Unit (LAFD CIU), LAFD Underground Storage Tank Division (LAFD USTD), and the City of Los Angeles Bureau of Sanitation (LABS) to determine if they have files related to hazardous materials, underground storage tanks, and industrial wastewater permits at the subject property.

According to a response from LAFD CIU on June 27, 2016, there are no records for the subject property. As of the date of this report, a response has not been received from LAFD UST.

LAFD HazMat provided hazardous materials inventory and business plan information and an inspection records for the LACMA facility. Hazardous materials reportedly stored at the site include compressed gases (acetylene, carbon dioxide, nitrogen, and oxygen), diesel fuel (1,200 gallons), liquid nitrogen (3,390-gallons), lubrication oils (60-gallons), refrigerants, vinyl wash pretreatment, acetone (10-gallons), various paints, resins, fixers, and reducers, and other small quantity laboratory chemicals. According to the records, during an inspection on June 26, 2015, LACMA was issued violations for failure to provide/submit a Hazardous Materials Business Plan, Business Activities page, and Business Owner Operator Identification Page, Hazardous Materials Inventory Chemical Description page, an annotated site plan map, and Emergency Response Plan. Based on the administrative nature of these violations, they are not considered a REC.

According to information provided by LABS, LACMA has been issued permits for wastewater generated from air conditioning units and laboratory film processing. The wastewater for the aforementioned permits was discharged to the public sewer and no pretreatment devices are listed. Additionally, Patina Group Newco LLC dba Patina Restaurant Group was issued an industrial wastewater permit for the discharge of wastewater generated from restaurant operations. The wastewater was reportedly discharged to the public sewer via stationary screens and a 2,500-gallon grease interceptor with sample box. The LABS files did not identify any RECs for the subject property.

5.5.2 County

AECOM submitted public records requests to the Los Angeles County Department of Health Services Public Health Investigations (LAC DHS PHI) for records pertaining to hazardous materials at the subject property. On June 30, LAC DHS PHI provided a response indicating that there are records for this subject property. However, at the time of this report, LAC DHS PHI has not provided access to the files.

5.5.3 State

AECOM submitted public records requests to the Department of Toxic Substance Control (DTSC) Chatsworth and Cypress offices and the Los Angeles Regional Water Quality Control Board (LARWQCB) to determine if they have files related to hazardous materials releases at the subject

property. Additionally, AECOM searched DTSC's online EnviroStor and Hazardous Waste Tracking System (HWTS) databases, the State Water Resources Control Board's (SWRCB) online GeoTracker database, the South Coast Air Quality Management District's (SCAQMD) online Facility Information Detail (FIND) database and the Department of Oil, Gas, and Geothermal Resources (DOGGR) Oil Well Finder database for information pertaining to the subject property.

According to a responses received on June 20, 2016, the DTSC Chatsworth and Cypress offices maintain no records for the subject property. As of the date of this report, a response has not been received from LARWQCB. The subject property is not listed on the EnviroStor or GeoTracker databases. The HWTS database identified LACMA as a hazardous waste generator. For more information regarding hazardous waste generated at the site refer to Section 5.3.1.

According to information provided by FIND, LACMA has been issued air emissions permits by SCAQMD for oil field machinery, spray paint booths, and contaminated soil. However, oil field machinery and spray paint booths maintained by LACMA are not located on the subject property and contaminated soil relates to petroleum hydrocarbon impacted soils identified during the redevelopment of the LACMA West campus (not subject property). Additionally, LACMA has been issued air emissions permits for boilers, diesel-powered electrical generators, and cooling towers and The Patina Group, LLC has been issued air emissions permits for natural gas and wood charbroilers. Based on the nature of the permits for mechanical equipment or restaurant operations, the permits are not considered a REC for the subject property.

According to the DOGGR Oil Well Finder database, an oil well (API 03714696) was mapped on the south adjoining property to the subject property at *APN 5089-011-154*. A file obtained from the database indicates that the well is located approximately 260 feet north of 8th Street and 260 feet east of Spaulding Avenue, placing the well on the south adjoining property. The well was reportedly abandoned in 1980. However, aerial photographs indicate an apparent oil well and associated cuttings pit to be located on the subject property in 1923. The oil well and associated cuttings pit appear to have been removed from the subject property by 1938. By 1938, the oil well and cuttings pit are not visible in aerial photographs. The potential exists that soils are impacted with heavy-end petroleum hydrocarbons associated with the former cuttings pit, and the former oil well and associated cuttings pit are considered a REC. Furthermore, information pertaining to the abandonment status of the well was not provided in any of the resources reviewed for this report. Proper re-abandonment of the well may be required prior to any redevelopment activities in this portion of the subject property.

5.5.4 Federal

AECOM searched the U.S. EPA's Envirofacts and Superfund Enterprise Management System (SEMS) online databases. The SEMS database replaced the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) which has since been retired. SEMS includes the same data fields and content as CERCLIS. The subject property was not listed on the Envirofacts or SEMS databases.

6.0 Findings and Opinions

AECOM performed a Phase I ESA of the subject property in conformance with the scope and limitations of ASTM Practice E 1527-13, which meets the requirements of Title 40, Code of Federal Regulations Part 312 and is intended to constitute *all appropriate inquiry* for purposes of the landowner liability protections. Any exceptions to, or deletions from, this practice are described in Section 1.3 through 1.5 of this report.

The following sections summarize the findings and opinions of this Phase I ESA of the subject property.

6.1 Recognized Environmental Conditions

The following RECs were identified during this assessment:

- Aerial photographs indicate an apparent oil well and associated cutting pit to be located on the subject property in 1923. The potential exists that soils are impacted with heavy-end petroleum hydrocarbons associated with the former cuttings pit, and the former oil well and associated cuttings pit are considered a REC. Furthermore, information pertaining to the abandonment status of the well was not provided in any of the resources reviewed for this report. Proper re-abandonment of the well may be required prior to any redevelopment activities in this portion of the subject property.

6.2 Controlled Recognized Environmental Conditions

Based on the above-described activities, no CRECs were identified in connection with the subject property.

6.3 Historical Recognized Environmental Conditions

Based on the above-described activities, no HRECs were identified in connection with the subject property.

6.4 De Minimis Conditions

The following DMCs were identified during this assessment:

- Naturally occurring tar was observed in vegetated area to the north of the Ahmanson and Hammer Buildings. Furthermore, naturally occurring tar was reported in borings during a geotechnical investigation at the subject property in 1984. The naturally occurring tar is considered a *de minimis condition* with respect to the subject property. Based on the proposed redevelopment of the subject property, it is expected that soils with naturally occurring tar will be encountered during construction activities. Additionally, methane mitigation measures will likely be required for future redevelopments.

6.5 Potential Business Risks

The following Potential Business Risk was identified during this assessment:

- According to the City of Los Angeles Department of City Planning, the subject property is located within an area that has been identified as a Methane Zone by the City of Los Angeles and the California Division of Oil, Gas and Geothermal Resources under Ordinance Number 175790, which took effect in March 2004. There is a potential methane hazard at the site due to its proximity within or adjacent to a known methane gas source (such as a landfill, oil well, oil field, or underground gas storage facility). AECOM recommends that any new construction at the subject property be designed and permitted to the requirements established by the City of Los Angeles Department of Building and Safety for sites located within the Methane Zone.
- Three emergency generators are utilized at the subject property. The generator located within an enclosure to the north of the Ahmanson Building is fueled by an integrated 2,000-gallon steel diesel belly tank within secondary containment. The generator located in the central portion of the Ahmanson Building is fueled by an integrated 10-gallon steel diesel belly tank within secondary containment. The generator located in the southern portion of the Bing Building is fueled by an integrated 30-gallon steel diesel belly tank within secondary containment. A 55-gallon drum containing diesel fuel was observed adjacent to the generator. Additionally, four oil-containing transformers, approximately 50-gallons in size, were observed within the Ahmanson Building and Art of Americas buildings, respectively. No evidence of leaks or staining was observed in the vicinity of the generators, drum, or transformers, with the exception of surficial staining observed in the vicinity of two of the transformers located in the Art of the Americas building. No other tanks were observed at the subject property. Based on the surficial nature of staining and the good condition of the transformers and ASTs, it is AECOM's opinion that the transformers and ASTs do not represent a significant environmental concern to the subject property. AECOM recommends the removal of the transformers and ASTs to the proper regulatory guidelines prior to any demolition activities.
- During the site visit, approximately six pad-mounted transformers were observed in the subject property buildings. As discussed above, four of the transformers contain oil. The remaining transformers were dry-type. Labeling indicating PCB content was not observed on the transformers. Surficial staining was observed in the vicinity of two of the transformers located in the Art of Americas building. Staining was not observed at the base of the other transformers. Based on the surficial nature, the staining is not expected to represent a significant environmental concern to the subject property. Ten hydraulic elevators service the subject property buildings. AECOM observed the elevator machine rooms and no leaks or stains were observed on the concrete floors. No other hydraulic equipment (transformers, trash compactors, lifts) was observed on the subject property. The on-site loading docks are manually operated. AECOM recommends the removal of the aforementioned equipment to the proper regulatory guidelines prior to any demolition activities.

7.0 Conclusions

We have performed a Phase I ESA in conformance with the scope and limitations of ASTM Practice E 1527-13 of a portion of the Los Angeles County Museum of Art (LACMA) East campus located at 5905 Wilshire Boulevard (APN 5508-016-901, excluding La Brea Tar Pits and Hancock Park), and the parcels located at 5864, 5886, 5892, and 5896 Wilshire Boulevard and 716 Spaulding Avenue (APN 5089-011-154) and 715, 717, 717, 719, 723, 729 and 731 South Ogden Drive (APN 5086-010-032, Lots 74, 75, and 76 only), Los Angeles, California, the property. Any exception to, or deletions from, this practice are described in Sections 1.3 through 1.5 of this report. This assessment has revealed no evidence of RECs, HRECs, or CRECs in connection with the property except the following:

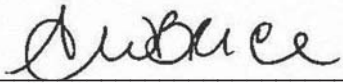

- Aerial photographs indicate an apparent oil well and associated cutting pit to be located on the subject property in 1923. The potential exists that soils are impacted with heavy-end petroleum hydrocarbons associated with the former cuttings pit, and the former oil well and associated cuttings pit are considered a REC. Furthermore, information pertaining to the abandonment status of the well was not provided in any of the resources reviewed for this report. Proper re-abandonment of the well may be required prior to any redevelopment activities in this portion of the subject property.

8.0 Quality Control/Quality Assurance

8.1 Site Visit, Research, and Report Preparation

The site visit was conducted by Ms. Alexandria Wadsworth-Brice with AECOM's Long Beach, California office.

Signature:

The research, and report preparation were conducted by Mr. Gareth Howell, in AECOM's Long Beach, California office.

Signature:

8.2 Quality Control Review

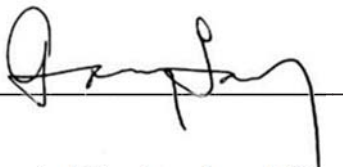

A first level review of this report was conducted by Ms. Christiane Tamayo, in AECOM's Long Beach, California office.

Signature:

A second level review of this report was conducted by Mr. Garry Lay, in AECOM's Los Angeles, California office.

Signature:

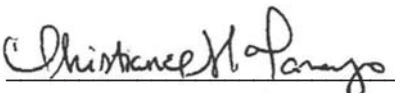

8.3 Environmental Professional Statement

Ms. Tamayo was the Environmental Professional (EP) for this project. Ms. Tamayo's EP statement is below and her resume is provided in Appendix G:

I declare that, to the best of our professional knowledge and belief, I meet the definition of an EP as defined in §312.10 of 40 Code of Federal Regulations (CFR) and that I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. I have developed and performed all the appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Signature:

Date: August 16, 2016

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 12/09/2015 has revealed that there is 1 RCRA-LQG site within approximately 0.25 miles of the target property.

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 12/09/2015 has revealed that there are 4 RCRA-SQG sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

State- and tribal - equivalent CERCLIS

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 02/01/2016 has revealed that there are 5 ENVIROSTOR sites within approximately 1 mile of the target property.

State and tribal leaking storage tank lists

LUST: The Leaking Underground Storage Tank Incident Reports contain an inventory of reported leaking underground storage tank incidents. The data come from the State Water Resources Control Board Leaking Underground Storage Tank Information System.

A review of the LUST list, as provided by EDR, and dated 03/14/2016 has revealed that there are 5 LUST sites within approximately 0.5 miles of the target property.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Lists of Registered Storage Tanks

SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there are 8 SWEEPS UST sites within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 4 EDR Hist Auto sites within approximately 0.125 miles of the target property.

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there are 2 EDR Hist Cleaner sites within approximately 0.125 miles of the target property.

Environmental Interest/Information System

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

 File Location: Not reported
 Potential Media Affected: Not reported
 Potential Contaminants of Concern: Tetrachloroethylene (PCE), Heating Oil / Fuel Oil, Methane
 Site History: Background: Based on information generated from the RAW, the Site was initially developed in the late 1920s or early 1930s. Since that time the Site had been occupied by a combination of single-family residences and commercial structures including a former dry cleaners and a three-story church with a basement. The 3.2-acre Site has been vacant since 2006 and is planned to be redeveloped for residential housing complete with ground floor retail and two levels of subterranean parking. The Site is situated within the Central Sub-basin of the Coastal Plain of the Los Angeles Groundwater Basin. Based on the information from the soil borings completed on the Site, the Site is generally underlain by alternating silt and clay layers with occasional fine grained sand layers to approximately 30 feet

below ground surface (bgs). Groundwater beneath the Site was encountered at depths ranging between 17 to 24 feet bgs. Due to a lack of appropriate onsite groundwater monitoring wells, groundwater flow direction or gradient has not been established. Since 1999, several Phase-I and Phase-II environmental investigations were conducted at the Site. Results of Phase-I investigations revealed no evidence of recognized environmental conditions (RECs) except for three following areas of concern (AOCs): AA Custom Cleaners (732 South La Brea) operated a dry cleaning from 1986 through 1996. Two 120-gallon and 280-gallon waste oil underground storage tanks (USTs) were reportedly removed from the Site, however no record of this removal is found. Two hydraulic passenger elevators and one former hydraulic service elevator that was located within the Wilshire Building since 1960. Remedial Action Plan: The proposed Site redevelopment plan includes construction of the subterranean Parking structure. This would require significant Site grading activities that would result in excavation of nearly the entire Site to approximately 16 feet to 20 feet below current street grade. Consequently, it is our understanding that this redevelopment and related excavation will remove all soil up to or below the water table across the entire of the 3.2-acre Site. Due to the relatively shallow depth to groundwater (approximately 16-20 feet bgs), dewatering and removal of the impacted groundwater is expected during the proposed removal activities.

<p>Region: STATE Facility Status: Open - Verification Monitoring Status Date: 01/21/2000 Global Id: SL2049G1726 Lead Agency: LOS ANGELES RWQCB (REGION 4) Lead Agency Case Number: Not reported Latitude: 34.071211 Longitude: -118.358632 Case Type: Cleanup Program Site Case Worker: ABL Local Agency: Not reported RB Case Number: 0898 File Location: Regional Board Potential Media Affected: Indoor Air, Aquifer used for drinking water supply, Soil, Soil Vapor Potential Contaminants of Concern: Not reported Site History: The Grove is a 16-acre commercial development site, has been historically related to oil production operations. Soil, soil gas, and groundwater beneath the property are impacted by petroleum hydrocarbons. No free product is present at the site. No municipal supply well is located within three miles from the site. Shallow aquifer is at 5 to 25 feet below grade. Several phases of environmental assessments including health risk assessment and remediation were conducted through 2000. Site soil gas mitigation system under residential landuse including vapor barrier and venting system for indoor air exposure pathway was permitted and installed. The complete site improvements satisfied human health protection requirements. The site has been redeveloped as commercial land-use prevents additional excavation.</p>

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

	Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMs by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

	Data Release Frequency: Quarterly

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 12/09/2015	Source: Environmental Protection Agency

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

LIENS 2: CERCLA Lien Information

A Federal CERCLA ('Superfund') lien can exist by operation of law at any site or property at which EPA has spent Superfund monies. These monies are spent to investigate and address releases and threatened releases of contamination. CERCLIS provides information as to the identity of these sites and properties.

DEED: Deed Restriction Listing

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing

Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water board's review found that more than one-third of the region's active disposal pits are operating without permission.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historic Gas Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

LACMA
5905 WILSHIRE BOULEVARD
LOS ANGELES, CA 90036

TARGET PROPERTY COORDINATES

Latitude (North):	34.063987 - 34° 3' 50.35"
Longitude (West):	118.356816 - 118° 21' 24.54"
Universal Transverse Mercator:	Zone 11
UTM X (Meters):	374787.8
UTM Y (Meters):	3769886.5
Elevation:	175 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	5630741 HOLLYWOOD, CA
Version Date:	2012

West Map:	5630733 BEVERLY HILLS, CA
Version Date:	2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principal investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General West

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

<u>Target Property County</u>	FEMA Flood
LOS ANGELES, CA	<u>Electronic Data</u>
	YES - refer to the Overview Map and Detail Map

Flood Plain Panel at Target Property: 06037C - FEMA DFIRM Flood data

Additional Panels in search area: Not Reported

NATIONAL WETLAND INVENTORY

<u>NWI Quad at Target Property</u>	NWI Electronic
HOLLYWOOD	<u>Data Coverage</u>
	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>
A1	1/2 - 1 Mile West	S
A2	1/2 - 1 Mile West	S

For additional site information, refer to Physical Setting Source Map Findings.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era: Cenozoic
System: Quaternary
Series: Quaternary
Code: Q (*decoded above as Era, System & Series*)

GEOLOGIC AGE IDENTIFICATION

Category: Stratified Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: URBAN LAND

Soil Surface Texture: variable

Hydrologic Group: Not reported

Soil Drainage Class: Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 10 inches

Depth to Bedrock Max: > 10 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Permeability Rate (in/hr)	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	6 inches	variable	Not reported	Not reported	Max: 0.00 Min: 0.00	Max: 0.00 Min: 0.00

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: sandy loam
 gravelly - sandy loam
 silt loam
 clay
 fine sand
 gravelly - sand
 sand
 fine sandy loam

Surficial Soil Types: sandy loam
 gravelly - sandy loam
 silt loam
 clay
 fine sand
 gravelly - sand
 sand
 fine sandy loam

Shallow Soil Types: fine sandy loam
 gravelly - loam
 sandy clay
 sandy clay loam
 clay
 silty clay
 sand

Deeper Soil Types: gravelly - sandy loam
 sandy loam
 very gravelly - sandy loam
 stratified
 very fine sandy loam
 weathered bedrock
 sand
 gravelly - fine sandy loam
 silty clay loam
 clay loam

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map

Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory

Source: Department of Fish & Game

Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

STATE RECORDS

Water Well Database

Source: Department of Water Resources

Telephone: 916-651-9648

California Drinking Water Quality Database

Source: Department of Public Health

Telephone: 916-324-2319

The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

OTHER STATE DATABASE INFORMATION

California Oil and Gas Well Locations

Source: Department of Conservation

Telephone: 916-323-1779

Oil and Gas well locations in the state.

RADON

State Database: CA Radon

Source: Department of Health Services

Telephone: 916-324-2208

Radon Database for California

Area Radon Information

Source: USGS

Telephone: 703-356-4020

The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones

Source: EPA

Telephone: 703-356-4020

Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by AECOM were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1920 through 2013. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 332 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. An "X" indicates where information was identified in the source and provided in this report.

**DRAFT PHASE I ENVIRONMENTAL SITE ASSESSMENT
LOS ANGELES COUNTY MUSEUM OF ART
PHASE III TRANSFORMATION PROJECT
5905 WEST WILSHIRE BOULEVARD
LOS ANGELES, CALIFORNIA**

INTRODUCTION

Shannon & Wilson, Inc. has completed a Phase I Environmental Site Assessment (ESA) for two Sites located in Los Angeles, California. Site #1, the Los Angeles County Museum of Art (LACMA) (East Campus) located at 5905 Wilshire Boulevard and Site # 2, the Spaulding Parking lot, located at the south east corner of South Spaulding Avenue and Wilshire Boulevard. The two properties are further describes in Section 2.0. The services were conducted for LACMA in accordance with our proposal **dated October XX, 2014.**

of a parcel (subject property) in the Columbia East Commercial Park in Pasco, Washington (City). The 3.74-acre property is located on the south side of Commercial Avenue, and is identified as Lot 2 of Binding Site Plan 2003-01. The property is further described in Section 2.0. The services were conducted for Columbia Basin LLC in accordance with our proposal dated October 30, 2014.

This report presents the results of our subsurface gas evaluation performed for the Phase III Transformation Project (the Project) for the Los Angeles County Museum of Art (LACMA). The Project is located within the LACMA Campus on an approximately 20-acre site located 5905 West Wilshire Boulevard in Los Angeles, California (Figure 1). The Project is located within the City of Los Angeles Methane Zone and will require mitigation of the building in accordance with Los Angeles Municipal Code, Division 71. This subsurface gas evaluation was performed on behalf of LACMA and the KPFF Consulting Engineers (KPFF) design team to address the potential impacts and mitigation of subsurface gas hazards during construction and operation of the Project.

1.1 Purpose

The purpose of the Phase I ESA was to review past and present land use practices and to evaluate the presence, or likely presence, or any hazardous substances or petroleum products that have been discharged into the property's structure, groundwater, and/or surface water. This qualitative assessment was accomplished by review of current and readily available information regarding past and current land use for indication of the manufacture, generation, use, storage and /or disposal of hazardous substances at either of the Sites. A site visit was also conducted to observe existing Site conditions. This report provides the results of the Phase I ESA performed.

The purpose of this Phase I ESA was to identify, to the extent feasible pursuant to the process described in the ASTM Practice E 1527-05 and E 1527-13 (Phase I ASTM Standard) *recognized environmental conditions* (RECs) or *controlled RECs* (CRECs) associated with the subject property. The term RECs means:

The presence or likely presence of hazardous substances or petroleum products in, on or at a property: (1) due to a release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment.

The term CREC means:

A REC resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by regulatory authority), with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls).

The terms REC and CREC are not intended to include de minimis conditions that generally do not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. Conditions determined to be de minimis are not RECs or CRECs.

The U. S. Environmental Protection Agency (EPA) has determined that the Phase I ASTM Standard is consistent with and meets the requirements for performing All Appropriate Inquiry (AAI) and may be used to comply with federal AAI regulations at 40 CFR Part 312. Washington State Model Toxics Control Act (MTCA) and Dangerous Waste Regulations define hazardous or dangerous wastes and/or substances, and contain information regarding discovery and reporting.

1.2 Scope of Services

The Phase I ESA was prepared for LACMA the property owner, also referenced in this report as Client. The services were performed in accordance with our proposal dated October 30, 2014. The scope of services for this assessment consisted of the following:

- Performed a Site inspection of both properties to verify current Site conditions, and check for the visible evidence of preciously disposed and/or currently present hazardous waste, surface contamination, underground and above ground storage tanks (USTs/ASTs), suspect polychlorinated biphenyl's (PCBs), and other potential environmental hazards.
- Conducted a visual survey of the adjacent properties and the immediate vicinity to determine if any nearby sites posed s significant environmental threat to the site Sites.
- Reviewed currently and readily available document, include ng maps, aerials photographs, governmental databases of known hazardous waste sites and underground tanks, other consultant reports, fire insurances maps and other accessible records.
- Prepared a Phase I Report, inclusive of our findings and recommendations, with applicable illustrations and documentation.
- Conducted the Phase I ESA in compliance with the All Appropriate Inquires (AAI) Final Rule published in 40 CFT Part 312 (December 30, 2013).
-

The Scope of the services outlined above is generally considered sufficient to properly assess the Site based on the data search, reasonably ascertainable documents and Site inspection.

Authorization to proceed was received on November 7, 2014 in the form of a signed proposal.

The scope of a Phase I ESA under the Phase I ASTM Standard does not include an evaluation of all environmental considerations that may be relevant to a particular transaction, such as testing for radon, lead-based paint, mold and asbestos or evaluation of indoor air quality, potential wetlands, regulatory compliance and health/safety matters.

1.3 Significant Assumptions

Information for the Phase I ESA was collected from numerous sources, including interviews with government agencies and others. The sources are identified in the body of this report and/or listed in the references section. The information obtained from these sources, to the extent relied upon in forming our opinions, is assumed to be accurate and complete. Persons who were interviewed are assumed to have answered all questions in good faith, accurately and to the extent of their knowledge.

1.4 Limitations, Exceptions and Data Gaps

As discussed in the Phase I ASTM Standard, performance of a Phase I ESA cannot eliminate uncertainty regarding the potential for hazardous substances or petroleum to exist at a property.

The use of this Phase I ESA is strictly limited to the scope set forth in the proposal. Certain environmental conditions may exist on a property that are beyond the scope of the Phase I ESA, but may still warrant consideration. For example, a site with contamination remaining may have been approved by regulatory authorities for closure and is not a REC presently. However, if the remaining contamination is disturbed during future site development work, environmental regulations may require testing and off-site disposal of contaminated materials.

The findings, opinions and recommendations contained in this report are based on information provided from the observed site conditions, personal interviews, and other sources identified herein. The data presented in this report should be considered representative of the time of our site assessment. Changes due to natural processes or human activity could have occurred after the date of our site reconnaissance and interviews but before the issuance of this report. In addition, changes in government codes, regulations, or laws may occur in the future that could alter the opinions formed at the time of this assessment. We have included as an appendix “Important Information About Your Environmental Site Assessment Report” to help you and others understand the use and limitations of our reports.

The following list identifies the deviations and exceptions from the standard requirements of the Phase I ASTM Standard and any data gaps encountered in performing the Phase I ESA despite our good faith efforts to gather such information. In our opinion, none of these impacted our ability to identify RECs associated with the subject site.

The following list contains the exceptions/deviations and data gaps encountered during this ESA:

- The following Standard Historical Sources listed in Phase I ASTM Section 8.3.4 were not reviewed for this Phase I ESA because they do not exist for sites in this area of Pasco:
 - Sanborn fire insurance maps

1.5 Special Terms and Conditions

None were applicable to this ESA.

1.6 User Reliance

The Phase I ASTM Standard defines “User” as the party seeking to use the standard to complete an environmental site assessment of the property and may include a potential property purchaser, a potential tenant, a property owner, a lender or a property manager. The information and opinions in this report are exclusively for the use of and reliance by the Client and their respective affiliates, representatives and agents. Reliance on this Phase I ESA by all authorized persons or entities is subject to the terms and conditions set forth in the proposal. No other persons or entities are entitled to rely on this report without prior written approval from Shannon & Wilson, Inc., which consent may be conditioned upon, among other things, payment of a fee. In any event, such third party’s reliance would be limited to the same extent of Client’s reliance and subject to the same contractual, technological and other limitations to which the Client has agreed.

2.0 SITE DESCRIPTION

2.1 Location and Legal Description

Site #1 is located on the existing LACMA East Campus parcel, Assessor Parcel Number (APN) 5508-016-901 and is bordered by Wilshire Boulevard to the south, West 6th Street to the north, the LACMA West Campus parcel and Fairfax Avenue to the west and South Curson Avenue to the east. The LACMA East Campus parcel encompasses approximately 23 acres and contains LACMA Campus buildings, including the Hammer, Ahmanson, Anderson, and Bing buildings, the George C. Page Museum, the La Brea Tar Pits and Tar Lake. A separate asphalt paved public parking lot is located to the north of the Page Museum building.

Site #2 is an existing asphalt paved parking lot, APN 5089-011-0154, located directly across Wilshire Boulevard to the south of Site #1. Site #2 is bordered by South Spaulding Avenue to the west, Wilshire Boulevard to the north, residential housing to the south and a commercial building with an associated parking lot to the east.

The Sites are located in the Northwest Quarter of Section 21, Township 1 South, Range 14 West of the San Bernardino Meridian. The location is shown in Figure 1; the two sites and nearby properties are shown in Figure 2.

It is bordered by Wilshire Boulevard to the south, Sixth Street to the north, Fairfax Avenue to the west and South Curson Street to the east. The site encompasses approximately 24 acres and contains two major building groups, the George C. Page Museum and LACMA. There is a separate paved

public parking are north of the page Museum building. On the same parcel exists the Page Museum, Tar Lake, Pit 91 excavation. Three major land features within the site are Oil Creek, Pit 91 and the Lake Pit.

2.2 Site and Vicinity Characteristics

The two Sites are located in a central urban area of Los Angeles, California containing mainly commercial and residential properties approximately 20 miles north of the Interstate 10 Freeway. The area is relatively flat with a slight southeast slope. Contours on the USGS topographic map (Hollywood Quadrangle) indicate that the ground surface elevation is approximately 175 feet above mean sea level (AMSL).

2.3 Current Use of the Property and Proposed Improvements

Site #1 is currently being used as a museum by Los Angeles County. The museum property is currently comprised of 4 buildings, the Hammer, Ahmanson, Anderson, and Bing. Equipment associated with the buildings include HVAC systems, boilers, elevators, humidifiers, transformers, and water softeners. Site #2 is currently being used as a parking lot.

The proposed project will include construction of a new museum building and parking upgrade. The new museum building will span over Wilshire Boulevard and occupy the existing Spaulding parking lot on the northwestern corner of Wilshire Boulevard and Spaulding Avenue. Construction will require the demolition of the existing Hammer, Ahmanson, Anderson, and Bing Center buildings and the removal of the Spaulding Parking Lot. The museum building will include a basement on the north side of Wilshire Boulevard and one level of underground parking on the south side of Wilshire Boulevard. Other existing LACMA improvements, including ancillary structures, and hardscape, and the Spaulding Parking Lot, will also be removed to accommodate construction of the Project.

2.4 Past Use of the Property

Based on available historical information, prior to 1924, the Site #1 property was undeveloped. In 1924, the property was donated by George Hancock to the County of Los Angeles under the stipulation that the property was to be used as park (Hancock Park) to preserve and exhibit the fossils associated with the naturally occurring tar pits located on the property. In 1964 the Ahmanson Building, the Bing Center and Hammer Building were constructed on the property in the location of LACMA Campus. By 1986 the Anderson Building was added to the LACMA Campus and by 1989 the Japanese Pavilion was constructed and became part of the LACMA Campus.

Up through the mid 1930's the Site #2 property was undeveloped. It remained mostly undeveloped and vacant, with the exception of what appear to be billboards located adjacent to Wilshire Boulevard up through the mid 1960's. Based on historical aerial photos it appears that starting in the mid 1960's the property was used as parking lot. By the early 1970's and through the present the parking lot appears to be asphalt paved.

2.5 Past and Current Use of Adjoining Property

Research conducted for this assessment indicates that Parr Lumber across Commercial Avenue to the north was constructed in 2005; Townsend Controls adjacent to the east was constructed prior to 2003, but after 1996. Reportedly, the adjacent property to the west was formerly part of a municipal dump, but is currently undeveloped. A municipal stormwater basin is located further northwest, and is also located on the former dump site. Additional information regarding the former dump is included in Sections 3.8 and 4.4.2.1.

3.0 USER-PROVIDED INFORMATION

The following information was requested of and/or provided by the Client.

3.1 Title Records

The Client furnished copies of a chain of title guarantee from Chicago Title Insurance Company dated October 29, 2014. Chain of ownership information is also included in a previous Phase I & II ESA report furnished by the Client (Technico Environmental Services [Technico], 1998). Information from these sources regarding ownership is summarized in Section 4.1.1 of this report.

3.2 Environmental Liens

An environmental lien is a charge, security or encumbrance upon title to a property to secure the payment of a cost, damage, debt, obligation or duty arising out of response actions, cleanups, or other remediation of hazardous substances or petroleum products upon a property, including but not limited to, liens imposed pursuant to the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) and similar state law.

The Client requested that Shannon & Wilson include a lien search in the project scope. We authorized Environmental Data Resources, Inc. (EDR) to perform this service. The search included Franklin County Tax Parcel No. 113520359. No environmental liens were identified in connection with the property. The EDR report is included in Appendix B.

3.3 Activity and Use Limitations (AULs)

AULs are one indication of a past or present release of a hazardous substance or petroleum products. AULs may consist of institutional controls (IC), such as a prohibition on certain use of the property or engineered controls (EC), such as an engineered barrier or cap over contamination. AULs are explicit recognition by a federal, tribal, state or local regulatory agency that residual levels of hazardous substances or petroleum may be present on the property. If AULs are in place, the User must comply with them in order to maintain landowner liability protections under CERCLA.

An AUL report is included in the EDR lien search report referenced in Section 3.2. No AULs were identified in connection with the property (Appendix B).

3.4 Specialized Knowledge

The Client indicated that he does not have specialized knowledge regarding the subject site or nearby properties related to environmental matters, other than what is indicated in two environmental reports furnished by the seller (Section 3.8).

3.5 Relationship of Purchase Price to Fair Market Value

The questionnaire completed by the Client indicates that, to his knowledge, the purchase price has not been discounted from fair market value due to real or perceived contamination at the property.

3.6 Owner/Occupant and Property Manager Information

The current property owner is Tippett Land & Mortgage Company, and the owner contact is Mr. Bob Tippett.

3.7 Reason for Performing Phase I ESA

Shannon & Wilson assumed for purposes of this Phase I ESA that the purpose for performing this Phase I ESA is to potentially be eligible for the landowner liability protections under CERCLA.

3.8

3.8.1 RECORDS REVIEW

4.1 Historical Use Information

The objective of consulting historical sources is to develop a history of the previous uses of the site and surrounding area in order to help identify the likelihood of past uses having led to RECs in connection with the site. We reviewed standard historical sources that were both reasonably ascertainable and likely to be useful.

4.1.2 Historical Maps and Drawings

4.1.3 Aerial Photographs

4.1.4 City Directories

4.2 Physical Setting

4.2.1 Regional and Site Geologic Setting

4.2.2 Regional and Site Groundwater

4.3 Radon Potential

4.4 Regulatory Database Search

Standard federal and state environmental records were researched consistent with the approximate minimum search distance set forth in Section 8.2.1 of the Phase I ASTM Standard for pertinent information regarding the environmental condition of the site, adjacent parcels and properties in the vicinity. The records were searched electronically through EDR. The EDR summary report is in Appendix F, and a CD with the full report is included with the printed report.

4.4.1 Standard Federal Records Sources

- 4.4.1.1 Superfund Sites (including National Priority List (NPL)) sites, Delisted NPL Sites, CERCLIS sites, CERCLIS No-Further-Remedial-Action-Plan Sites.**
- 4.4.1.2 RCRA Facilities (including CORRACTS, non-CORRACTS TSD Facilities, and RCRA Generators)**
- 4.4.1.3 Institutional Control / Engineering Control Registries**
- 4.4.1.4 Emergency Response Notification System (ERNS)**
- 4.4.1.5 Summary of Federal Records**

4.4.2 Standard State Records

- 4.4.2.1 Hazardous waste site lists for investigation/remediation, NPL-equivalent lists, CERCLIS-equivalent lists, and Landfill and/or solid**

- CSCSL Confirmed and suspected contaminated sites list (Ecology)
- HSL A subset of CSCSL list; site assessed for risk with 1 being the highest and 5 the lowest assessed risk to human health and environment; 0 denotes a federally-listed NPL site.
- ICR Independent Cleanup Reports (Ecology)
- INST CONTROL Institutional Control Sites List (Ecology)
- LUST Leaking underground storage tank list (Ecology)
- NFA No further action required
- RCRA - CESQG Resource Conservation and Recovery Act conditionally exempt small quantity generator (EPA)
- UST Registered underground storage tank list (Ecology)
- VCP Voluntary Cleanup Program (Ecology)

4.4.2.2 Registered underground storage tank (UST) sites

4.4.2.3 Leaking underground storage tank (LUST) sites

Naturally occurring tar pits are present on Site #1 property along with Tar Lake which is located in the south eastern portion of the property. No tar pits, ponds or lagoons were observed on the Site #2 property.

5.3.2 Septic Systems

No septic systems were observed on the site.

5.3.3 Stained Soil or Pavement

Naturally occurring tar seeps are present at the ground surface in areas across the Site #1 property. It was not observed on the Site #2 property.

5.3.4 Stressed Vegetation

Other than vegetation conditions typical of arid, non-irrigated locations, no stressed vegetation was observed on site.

5.3.5 Aboveground and underground storage tanks

No aboveground or underground storage tanks were observed on site.

5.3.6 Odors

No odors other than the presence of Methane and hydrogen sulfide were noted on the Site #1 property at the time of our site visit. No odors were noted on the Site #2 property at the time of our visit.

5.3.7 Pools of Liquid

No pools of liquid were observed on the site.

5.3.8 Drums or Hazardous Substances / Petroleum Products Containers

No drums, hazardous substance or petroleum product containers were observed on the site.

5.3.9 Unidentified Substance Containers

No unidentified substance containers were observed on the site.

5.3.10 Electrical or hydraulic equipment with PCBs

No electrical or hydraulic equipment was observed on the site.

5.3.11 Wastewater or stormwater discharges

No wastewater or stormwater discharges were observed at the time of our site visit.

5.3.12 Unidentified Fill Material and Debris

No unidentified fill material or debris was observed on the site.

ENVIRONMENTAL LIEN REPORT

The NETR Environmental LienSearch Report provides results from a search of available current land title records for environmental cleanup liens and other activity and use limitations, such as engineering controls and institutional controls.

A network of professional, trained researchers, following established procedures, uses client supplied property information to:

- search for parcel information and/or legal description;
- search for ownership information;
- research official land title documents recorded at jurisdictional agencies such as recorders' office, registries of deed, county clerks' offices, etc.;
- access a copy of the deed;
- search for environmental encumbering instrument(s) associated with the deed;
- provide a copy of any environmental encumbrance(s) based upon a review of key words in the instrument(s) (title, parties involved and description); and
- provide a copy of the deed or cite documents reviewed;

Thank you for your business
Please contact NETR at 480-967-6752
with any questions or comments

C. L. LOGAN, County Recorder, by 71 Anderson Deputy.

DEED. In consideration of One Dollar and the performance of covenants and agreements hereinafter assumed by the County of Los Angeles, I, the undersigned G. Allan Hancock, of the City of Los Angeles, County of Los Angeles, State of California, do hereby grant to the County of Los Angeles, State of California, a body politic and corporate, upon the terms and conditions hereinafter set forth, for public park purposes, all that certain real property situate in the County of Los Angeles, State of California, described as follows:

A portion of lot 12 Tract No. 215 as shown on a map recorded in Map Book 14 pages 42 and 43 Records of Los Angeles County, and lying within the following described boundary lines; Beginning at the intersection of the easterly line of said lot 12 with the northerly line of Wilshire Boulevard as shown on a map recorded in Book 3462 page 287 and 208 of deeds, records of said County thence N. 0° 07' 30" W. along said easterly line of Lot 12, 971.55 feet; thence N. 87° 53' 30" W. 1409.91 feet; thence S. 7° 30' 40" W. 936.57 feet to the northerly line of said Wilshire Boulevard; thence S. 82° 09' 40" E. along the northerly line of said Wilshire Boulevard 505.13 feet to an angle point therein; thence S. 88° 32' 10" E. along the northerly line of said Wilshire Boulevard 1032.69 feet to the place of beginning.

To have and to hold unto the said County of Los Angeles and its successors for the uses and purposes and upon and subject to the terms and conditions hereinafter expressed. And the said County agrees, in consideration of this conveyance, to fully keep and perform each and all of its obligations hereinafter assumed, which are expressed as follows:

The said County agrees, First: That it will enclose the said grounds with a stone fence along Wilshire Boulevard which shall extend back upon the sides to a depth of one-third the length of the side line, and around the remainder of the said grounds the enclosure shall be constructed of a substantial wire enclosure or some other substantial form of a fence which shall present on both sides a good appearance; that it will lay out the said grounds in accordance with the plans for the same made by Paul G. Thiens, in duplicate, both copies signed by the Chairman of the Board of Supervisors and the Grantor herein, one copy thereof being filed in the records of the office of the County Supervisors, where the same is to be kept, the other copy being in the possession of the Grantor herein; that it will expend during the calendar year 1917 in laying out the grounds and in the employment of labor therefor, supervision and engineering expenses the sum of at least \$25,000.00.

Second: The roads which are to be laid out in said park are to be finished with oil, macadam, or

For Accuracy
to #10000
to #10000
Original #10000

some other material equally as good. Paths for pedestrians shall be constructed through the said grounds, in accordance with said plans, and at points the paths shall cross the roads by industrially fixed viaducts so constructed that they would appear as natural breaks in the landscape; and where desirable, bridges are to be constructed over the watercourses, of artistic design; also comfort stations for the use of the public, as indicated upon the said plans, arbors and seats and benches shall be constructed at convenient and proper places for the use of the public. Parking places shall be constructed at or near the northeast corner and the northwest corner. It is provided, however, that whenever desired by the Grantor herein that an opening shall be made into the said park through the northern line thereof, as follows: A drive and footpath entrance near the northeast corner and two entrances for pedestrians at two other points in said northern line, the object being to admit visitors from Fourth street and from the adjacent property into the said Park.

Third: In the northeast corner of the Park there is to be located and constructed a field house group, this group to consist of a combined rest room and museum 107 by 50 feet, a supervisor's office and a rest pavilion in the center of the court, joined by the comfort stations for men and women, and a superintendent's house with service yard and storage room. In the said museum there shall be set up, placed and kept a number of the complete skeletons, excavated from the said premises.

Fourth: The old Hancock residence at the south central portion of the property is to remain where it is, as a landmark, and to be restored and kept up in a suitable condition, and in harmony with the rest of the Park.

Fifth: At the junction between the three roads near the southeast entrance, nearest the City, would be located the Historical Group indicating the purpose of the park and the history of this section of the Country, the central monument to be constructed of suitable size, design and cost, subject to the approval of the Grantor, and on the base is to be carved the donor's name and the nature of the donation.

Sixth: The natural depressions that now exist upon the property shall be enlarged and filled with water, the upper lake in front of the field house group emptying into the lower lake at the southwest corner of the park through the natural low waterbed that now connects them. The lower lake would be formed by the road embankment which would act as a dam. The lake below the Hancock landmark shall empty into the lower lake through a channel already cut and running parallel with the Wilshire Boulevard. The waterways shall be kept replenished with water.

Seventh: At the heads of the lakes and along the streams in such spots as would fit them most naturally and most effectively shall be placed casts of cement, life sized replicas of the reconstructed animals imbedded in the pits and which shall embody and represent one or more of the following animals; the imperial elephant, giant ground sloth, sabertooth tiger, bison, wolf and camel.

Eighth: There shall be preserved and protected a pit or pits about the center of the property in which the fossil remains are in place, and sufficient of the other pits from which any fossil or fossils may have been excavated, to show the manner of such excavation and the location and condition of the fossil remains which have been deposited, and the original fossil remains may be used, or artificial replicas of such fossils may be substituted because of their greater durability. Several of these pits should be kept open for public use.

Ninth: There shall be planted and maintained upon the property at suitable places, for purposes of ornament, plants, shrubbery, trees, grass and flowers, preferably indigenous to Cali-

Formia. Tenth. Provision shall be made for an adequate electric lighting system throughout the park, as well as for an irrigating system and storm drain.

Eleventh. Said County shall maintain said property forever for public park and exhibition purposes only, and the same shall be open to public use at all times, subject to proper restrictions to be provided by the Board of Supervisors of said County. No business of any kind shall be conducted upon the aforesaid property, nor shall said property or any portion thereof be used for the purpose of development of oil, gas or any mineral product.

Twelfth. The party of the second part may make further explorations upon the said grounds for the purpose of recovering fossil remains which may be imbedded therein, using precaution to avoid unnecessary injury to the grounds and ornamental features of the park hereinbefore provided for, and may use the fossils to be extracted therefrom, or some of them, for the purpose of the County Museum in the City of Los Angeles, and shall exchange all of the duplicates of fossils not in use which may be hereafter recovered, or which have been heretofore excavated and are now in the museum, for objects of general interest to be obtained from other museums and collections, and those which are to be thus secured are to be placed in the Hancock Department of said County Museum. Party of the Second Part also agrees to place a plate or mural tablet in a conspicuous place in the County Museum where the fossils are kept, of a suitable size, design and cost, subject to approval of Grantor, with inscription thereon referring to the La Brea pits from which the fossils are taken, with the donor's name and the nature of the donation.

Thirteenth. It is agreed that the whole of the work on the park provided for herein shall be completed on or before five years from this date.

In the event that the Grantee herein, the County of Los Angeles, shall fail, neglect or refuse to perform each or any one of the conditions, the land hereby granted shall revert to and become the property of the Grantor herein, his successors or assigns.

In Witness Whereof, the grantor has hereunto set his hand, this 6th day of December 1916.

G. Allan Hancock.

State of California, County of Los Angeles,) ss.

On this 6th day of December 1916, before me Rosalie W. Trowbridge a Notary Public in and for the said County and State, residing therein, duly commissioned and sworn, personally appeared G. Allan Hancock, known to me to be the person whose name is subscribed to the foregoing instrument and acknowledged to me that he executed the same.

This Indenture, made this 18th day of February, A.D., 1924, by and between G. Alan Hancock, hereinafter called the Grantor, and the County of Los Angeles, State of California, a body politic and corporate, hereinafter called the Grantee,

Witnesseth: that in consideration of the acceptance of this conveyance by the Grantee, the Grantor does hereby grant to the Grantee that certain property in the County of Los Angeles, particularly described as follows, to-wit: A portion of Lot Twelve (12), Tract No. 215, as per Map recorded in Map Book 14, Pages 42 and 43, Records of Los Angeles County, State of California, described as follows: Beginning at a point on the northerly line of Wilshire Boulevard (one hundred -100- feet wide), distant along said northerly line South eighty-two (82) degrees ten (10) minutes fifteen (15) seconds East, six hundred forty-nine and ninety-five hundredths (649.95) feet from the northeast corner of said Wilshire Boulevard and Fairfax Avenue (seventy -70- feet wide upon this 18th day of February, 1924): thence along the said northerly line of Wilshire Boulevard South, eighty-two (82) degrees ten (10) minutes fifteen (15) seconds East, six hundred thirty-one and fifty-seven hundredths (631.57) feet; thence along said northerly line of Wilshire Boulevard South, eighty-eight (88) degrees thirty-three (33) minutes East, seven hundred eighteen and thirteen hundredths (718.13) feet thence leaving said northerly line of Wilshire Boulevard, north eight hundred eight and fifty-seven hundredths (808.57) feet thence South, eighty-nine (89) degrees fifty-four (54) minutes thirty (30) seconds West, thirteen hundred forty-three and fifty-nine one-hundredths (1343.59) feet; thence South, seven hundred two and twenty-one hundredths (702.21) feet to point of beginning. To have and to hold the same unto the Grantee for the uses and purposes, and upon and subject to terms and conditions hereinafter expressed.

This conveyance is made upon and subject to the following conditions subsequent, all of which shall also be treated and construed as covenants running with the land, all of which conditions and covenants the Grantee assumes and agrees to perform and abide by, and expressly makes binding upon its successors and assigns, viz.:

- 1st: That said property shall not, nor shall any part thereof, be used for any purpose other than public park purposes;
- 2nd: That said property shall forever be maintained and kept open to the public as a public park, and that no charge or fee shall be made or collected for admission thereto, provided, however, that the public may be excluded therefrom or from any part thereof during any of the hours of darkness under such regulations as may be prescribed by Grantee, and also during periods when improvement or construction work is in progress thereon;
- 3rd: That the use of any part or parts of said property for public street purposes shall not be deemed a violation of the foregoing two conditions
- 4th: That no structure other than an ornamental fence through which observers from the outside may look freely into the park, or other than a wall no higher than five (5) feet, or other than ornamental gate posts, or other than a statue or statues, shall be erected.

placed or maintained on said property closer than thirty (30) feet from the line of any street which abuts said property or any part thereof. 5th: That no hedge of a greater height than five (5) feet shall be maintained on said property closer than thirty (30) feet from the line of any street which abuts said property or any part thereof

6th: That the breach of any of the conditions and covenants herein contained shall cause said premises, together with the appurtenances thereunto belonging, to be forfeited to and reverts to the Grantor, his heirs, successors and assigns, each of whom shall have the right to immediately re-entry upon such premises in the event of such breach.

7th: That said property shall forthwith be, and shall hereafter remain, named as "Hancock Park". This conveyance is made subject to the lien of any taxes or assessments that may attach to said property, subsequent to the date hereof.

In witness whereof, the Grantor has hereunto set his hand the day and year herein first above written.

G. Allan Hancock, Grantor.

State of California, County of Los Angeles, ss. On this 18th day of February, A.D., 1924, before me, Florence M. Sampson, a Notary Public in and for the said County and State, residing therein, duly commissioned and sworn, personally appeared G. Allan Hancock, known to me to be the person whose name is subscribed to the within instrument, and acknowledged to me that he executed the same. In witness whereof, I have hereunto set my hand and affixed my official seal the day and year in this Certificate first above written.

(Notarial Seal) Florence M. Sampson, Notary Public in and for said County and State of California. My Com. exp. July 6th, 1926. Accepted by Board of Supervisors February 18, 1924, Minutes, Vol. 89 Page 365.

In re Hancock Park: Resolution Accepting Property from G. Allan Hancock and authorizing Chairman to execute Agreement. On motion of Supervisor Woodley, duly seconded and carried, it is ordered that the following Resolution be, and the same is hereby adopted:

Whereas, one G. Allan Hancock has, on the 18th day of February, 1924, signed and executed a certain indenture and instrument in writing, conveying certain property to the County of Los Angeles, said property being situated in the county of Los Angeles, State of California, and being more particularly described as follows, to-wit:

"A portion of Lot Twelve (12), Tract No. 215, as per Map recorded in Map Book 14, Pages 42 and 43, records of Los Angeles County, State of California, described as follows:

Beginning at a point on the northerly line of Wilshire Boulevard (one hundred (100) feet wide), distant along said northerly line South eighty-two (82) degrees ten (10) minutes fifteen (15) seconds East, six hundred forty-nine and nine-tenths (649.9) feet from the northeast corner of said Wilshire Boulevard and Fairfax Avenue (Seventy (70) feet wide upon this 18th day of February, 1924); thence along the said northerly line of Wilshire Boulevard South, eight-two (82) degrees ten (10) minutes fifteen (15) seconds East, six hundred thirty-one and fifty-seven hundredths (631.57) feet; thence along said northerly line of Wilshire Boulevard South, eighty-eight (88) degrees thirty-three (33) minutes East, seven hundred eighteen and thirteen hundredths (718.13) feet; thence leaving said northerly line of Wilshire Boulevard, north eight hundred eight and fifty-seven hundredths (808.57) feet; thence South, eighty-nine (89) degrees fifty-four (54) minutes thirty (30) seconds west, thirteen hundred forty-three and fifty-nine one-hundredths (1343.59) feet; thence South, seven hundred two and twenty-one hundredths (702.21) feet to point of beginning." And, whereas, said G.

Allan Hancock has, on the 18th day of February, 1924, signed a certain agreement in writing, in words and figures as follows, to-wit: "This Agreement, made this 18th day of February, A. D., 1924, by and between G. Allan Hancock, hereinafter called "Hancock", and the County of Los Angeles, State of California, a body politic and corporate, hereinafter called the "County",

witnesseth: That whereas, Hancock is this day delivering in escrow to A. M. McPherron, a conveyance for public park purposes of certain property in Lot Twelve (12) Tract 215, to be delivered to him by the County upon certain conditions expressed in the escrow instructions,

Now Therefore, in consideration thereof, and of the conditions and agreements hereinafter contained, the parties hereto do hereby each agree with the other as

follows: Hancock agrees to dedicate for public street purposes a strip of land of uniform width of sixty (60) feet, abutting the easterly line of the property described in said conveyance, the northerly line of said property and the westerly line of said property.

The County agrees forthwith to appropriate from its general fund sufficient money to, and with all due diligence to, improve the half abutting the park property of each of said three streets in the following manner: (a) Each street is to be graded to a proper grade, to conform to the grade established or to be established on adjoining property.

(b) A cement curb, and a sidewalk at least five (5) feet in width, is to be installed on each street. (c) The surface of the street is to be macadamized, rolled and oiled.

(d) A water main is to be placed in each street. (e) A gas main is to be placed in each of the northerly and southerly streets. Hancock agrees to pay one-half of the cost of the gas mains and one-half of the cost of the water mains which are laid in the north and south streets, and the cost of improving in a manner similar to that above prescribed, the other one-half of the said three streets. The County agrees forthwith to appropriate and set aside the sum of Twenty-five Thousand Dollars (\$25,000.00) to be used in landscaping and improving the park property; and agrees to appropriate and use such portion of said sum as is necessary for, and to complete the improvement of the easterly thirty (30) feet of the park, the northerly thirty (30) feet of the park, and the westerly thirty (30) feet of the park, with walks or driveways, and trees, shrubs and lawns, said last mentioned improvements to be completed on or before January 1st, 1925, and to be of a general character comparable favorably in design and arrangement with the Los Angeles City Park known as La Fayette Park, lying between Sixth Street and Wilshire Boulevard.

In witness whereof, the said Hancock has hereunto set his hand and the said County of Los Angeles has hereunto caused its name and official seal to be affixed, the day and year herein first above written.

G. Allan Hancock By Raymond W. Stephens
and Emil A. Olson
County of Los Angeles.

By Chairman of Board of Supervisors,

Attest: L. E. Lampton, County Clerk,
By Deputy.

And, whereas, said G. Allan Hancock has this day handed to one A. M. McPherron, Clerk of the Board of Supervisors, County of Los Angeles, in his individual capacity, said indenture and instrument in writing, said agreement in writing, together with a letter addressed to said A. M. McPherron under date of February 18th, 1924.

Now, therefore, be it resolved, that the said indenture and instrument in writing conveying said property to the County of Los Angeles be and the same is hereby accepted, and

Be it further resolved, that the Chairman of the Board of Supervisors be and he is hereby empowered and authorized to sign and execute said agreement by and between said G. Allan Hancock and the County of Los Angeles, for and on behalf of the County of Los Angeles and he is further empowered and authorized to deliver said agreement to said A. M. McPherron when the same has been duly executed by him.

The foregoing order was adopted by the Board of Supervisors of the County of Los Angeles on February 18th, 1924, and is entered in Book 89, Page 365, Minutes of said Board.

(Board of Supervisors Seal) L. E. Lampton, County Clerk
By L. E. Paxton, Deputy.

#1619. Copy of original recorded at request of Supervisors, Mar. 26, 1924, at 21 Min. past 11 A.M. Copyist 99. Compared, C. L. Logan, County Recorder, By Deputy.

Know all men by these presents: that the Mortgage made by Sebastian Manupelli and Grace Manupelli, his wife, the parties of the first part, to The State Bank of Pomona a Corporation existing and doing business under the laws of California and having its principal place of business at Pomona, California, the party of the second part, and recorded in the office of the County recorder of the County of Los Angeles, State of California, in Book 1292 of Official records, at Page 171, on the 10th day of August, A.D. 1922, together with the debt thereby secured, is fully paid, satisfied and discharged.

In witness whereof, said Corporation by its Cashier thereunto duly authorized, has here-

The Department of Toxics Substances Control (DTSC) takes every precaution to ensure the accuracy of data in the Hazardous Waste Tracking System (HWTS). However, because of the large number of manifests handled, inaccuracies in the submitted data, limitations of the manifest system and the technical limitations of the database, DTSC cannot guarantee that the data accurately reflect what was actually transported or produced.

History must be complete in all detail. Use this form to report all operations during drilling and testing of the well or during redrilling or altering the casing, plugging, or abandonment with the dates thereof. Include such items as hole size, formation test details, amounts of cement used, top and bottom of plugs, perforation details, sidetracked junk, bailing tests and initial production data.

Date

ABANDONMENT

- 4/21 Rigged up; circulated with mud and drilled to 128'.
- 4/22 Shot cavity @ 108'; run in tubing to 115'; pumped 5 yds. 8 sack sand slurry pull tubing and squeezed with 50 ft. - \emptyset pressure; run in tubing to 48' - hit solid; pumped 4 yds. 8 sack sand slurry - mud returns outside casing -- no cement returns. OK per DGG.
- 4/23 Tagged plug @ 5'. Cut off 8' of casing and weld on top plate.

Special Report on Operations Witnessed

No. T.....

Cal..... 192.....

Mr.....

Cal.

Agent for Wilshire Oil Producer Company

DEAR SIR:

Operations at your well No. 2 Section 28, T. 1S, R. 14W, S. 13, B. & M.,
Salt Lake Oil Field, in Los Angeles County, were witnessed by

A. B. Hendrickson, representative of the supervisor,

on Feb. 20, 1925. There were also present H. A. Gaddie, Superintendent
and Bert Whetstone, Driller

Casing Record 15 5/8" landed 150'; 12" cemented 483', w.s.o.; 10" cemented 620', w.s.o.; 8" liner
landed 2120', including 500' perforated at bottom, cut and pulled

The operations were performed for the purpose of (1) proposed from 1200' to about 1170'

(Casing record cont'd) from about 1600'
and the data and conclusions are as follows:

(B.) Gaddie

1. On February 18, 1925, the 10" casing was shot at 1500', 1400' and 1300', each time with a 4"x2', 80% gelatin shot. After each of the above shots, the casing could not be pulled.
2. On February 18, 1925, the 10" casing was shot in fluid at 1175' with a 4"x2', 80% gelatin shot.
3. The hole was cleaned out to 1175' and 15 sacks of Victor cement dumped at 1175', February 19, 1925.

WILSHIRE OIL PRODUCERS

July 24, 1926.

Well No. 2 and well No. 3, Sec. 28-1-14, Salt Lake.

Several letters were addressed to this company in an endeavor to obtain the log and history of these wells, which letters are filed with record of well No. 2.

Under date of Oct. 28, 1925, a letter was received from the company, which letter is on file with the well record of well No. 2, and which gives the following information regarding well No. 3:

--Well No. 3
43' clay
54' asphalt
97' to 500' shale and oil - no water.

100' 12" s.p. casing. No other pipe."

Apparently impossible to obtain the logs and histories of these wells on the proper forms. No further attempt will be made, therefore, to obtain same, and the records of the wells are closed.

E. Augustine
Deputy Supervisor.

Report on Test of Water Shut-off (BAILING)

No. T -1-1486

Los Angeles, Cal.

June 17, 1921

Mr. C. E. Hopkins,

Los Angeles, Cal.

Agent for WILSHIRE OIL PRODUCERS Company

DEAR SIR:

Your well No. 2 Section 28, T. 15., R. 14W., S.B. B. & M., Salt Lake Oil Field, in Los Angeles County, was tested for

shut-off of water on June 14, 1921. Mr. V. H. Wilhelm, designated by the supervisor, was present as prescribed in Section 19, Chapter 718, Statutes 1915, as amended, and there were also present Messrs. R. B. Taylor, Manager, and R. Kerr, Driller.

Location of water tested Upper.

Depth and manner of water shut-off: { 483 ft. of 12 1/2 in. 45 lb. casing was cemented 5/18/21 in shell } { landed } Formation

at 483 ft. with 60 sacks Riverside cement by dump bailer, 400 lb. pressure / method; 12 1/2 cable tools were used in landing water string.

Casing record of well 12 1/2 as above, only.

Reported total depth of hole 485 ft. Hole bridged from 0 ft. to 0 ft. Hole cleaned out to 485 ft. for this test.

At time of test depth of hole measured 485 ft.

At 2:00 p.m., June 13, 1921, oil ~~was bailed~~ water bailed to 485 ft. Dry.

At 10:00 a.m., June 14, 1921, top of oil found at 470 ft. top of water found at 470 ft.

Result of bailing test:

MR. KERR REPORTED THE FOLLOWING:

- 1. No water entered the well, when bailed dry for a casing test.
2. The top of the hard cement was found 25' above the shoe.

THE INSPECTOR NOTED THE FOLLOWING:

2.22 bbl. of water entered the well in 18 hours, (equivalent to 2.88 bl. per 24 hr.).

RECOMMENDATION:

The water shut-off is approved.

**Report on Test of Water Shut-off
(BAILING)**

No. T. -1-1734.

Los Angeles, Cal. October 14, 1921.

Mr. C. E. Hopkins,

Los Angeles, Cal.

Agent for WILSHIRE OIL PRODUCERS Company

DEAR SIR:

Your well No. 2, Section 28, T. 1S., R. 14W., S.B. B. & M.

Salt Lake Oil Field, in Los Angeles County, was tested for

shut-off of water on Oct. 11, 1921. Mr. W. W. Copp,

designated by the supervisor, was present as prescribed in Section 19, Chapter 718, Statutes 1915, as amended, and there were also present

Messrs. R. B. Taylor, Manager; and Ralph Kerr, Driller.

Location of water tested between 483' and 1620' and normal fluid level 380'.

Depth and manner of water shut-off: { 1620 ft. of 10 in. 35 lb. } casing was { cemented } in shell.
 { _____ ft. of _____ in. _____ lb. } { laced } Formation

at 1620 ft. with 75 sacks Riverside cement by Perkins method; Cable tools
Size and kind
 were used in landing water string; underreamed to 12".

Casing record of well 12 1/2" cemented 483' (water shut off); 10" as above
15" at 150' (S.P.)

Reported total depth of hole 1632 ft. Hole bridged from x ft. to x ft. Hole cleaned out to 1632 ft. for this test.

At time of test depth of hole measured 1632 ft. and bailer brought up sample of sandy shale showing oil.

At 7 p.m., Oct. 10, 1921, oil bailed to 1000 ft., water bailed to 1000 ft.

At 10:30 a.m., Oct. 11, 1921, top of oil found at 955 ft., top of water found at 1183 ft.

Result of bailing test:

MR. TAYLOR REPORTED THE FOLLOWING:

1. No water entered the well after standing 4 days when bailed to 1000' for a casing test.
2. 15' of hard cement was drilled out of the 10" casing.
3. Oil and gas were encountered at 1620' in sandy shale.

THE INSPECTOR NOTED THE FOLLOWING:

1. 55' of oil was found above the bailing depth and the water was found 183' below the reported water level.
2. Considerable gas was issuing from the well.

CONCLUSION:

The test of water shut-off is indeterminate due to the fact that the water level was found 183' lower than reported.

RECOMMENDATION:

Approval of the water shut-off is deferred pending a production test to be conducted at the well 30 days after the well has been on production. For this test the well should not be drilled below the first stratum of shale below the present oil sand.

Report on Proposed Operations

No. P. 1-1718

Los Angeles

Dec. 7, 191-20

Mr. R. B. Taylor

Los Angeles Cal.

Agent for WILSHIRE OIL PRODUCERS

DEAR SIR:

Your proposal to commence drilling Well No. 2, Section 28 T. 1 S. R. 14 W., S.B. B. & M.,

Salt Lake Oil Field Los Angeles County, dated Nov. 29, 191-20

has been examined in conjunction with records filed in this office.

Present conditions as shown by the records and the proposal are as follows:

PROPOSAL:

The notice gives the following information and proposal:

LOCATION: 140 feet S. Wilshire Boulevard and 60 feet W. from East line of property.

ELEVATION: Not given.

ESTIMATED DEPTH TO OIL SAND: 1200 feet more or less.

PROPOSED CASING RECORD: "16" Stove pipe 30# casing landed at a depth of 60' 10" I. D. Screw 35# " cemented at a depth of 1200' to oil sands."

Recommendation:

On December 9, 1920, Mr. R. B. Taylor reported to this office that oil which rose to the surface was encountered at depths of 510' and 530' in your well No. 1, adjoining. Your proposal to drill is approved with the following provisions:

- 1. This department must be notified when oil or gas showings are encountered.
2. A decision as to the exact depth for shutting off water is deferred pending further information as to the depth to oil bearing formations.
3. Weekly drilling reports should be filed with this office as soon as drilling is commenced.

This notice must be given before drilling begins

Los Angeles Cal. Nov. 29 19 20

Mr. Irvin V. Augur

Deputy State Oil and Gas Supervisor

Los Angeles Cal.

DEAR SIR:

In compliance with Section 17, Chapter 718, Statutes of 1915, notice is hereby given that it is our intention to commence the work of drilling well number 2 Section 28 T. 1-S. R. 14, W. S. B. & M., Salt Lake Oil Field, Los Angeles County.

The well is 140 feet N. or S., and 80 feet E. or W. from East line of property
(Give location in distance from section corners or other corners of legal subdivision)

The elevation of the derrick floor above sea level is _____ feet.

We propose to use the following strings of casing either cementing or landing them as here indicated:

Size of Casing, Inches	Weight, Lbs. Per Foot	New or Second Hand	Depth	Landed or Cemented
16" Stove pipe	30#	new	60 ft.	landed
10" I.D. Screw	35#	second	1200 to oil	sands cement

It is understood that if changes in this plan become necessary we are to notify you if possible before cementing or landing the casing.

We estimate that productive oil or gas formation should be encountered at a depth of about 1200 feet, more or less.

Respectfully yours,

Special Report on Operations Witnessed

No. T.....

Cal..... 192.....

Mr.....

Cal.

Agent for Wilshire Oil Producer Company

DEAR SIR:

Operations at your well No. 2 Section 28, T. 1S, R. 14W, S. 13, B. & M.,
Salt Lake Oil Field, in Los Angeles County, were witnessed by

A. B. Hendrickson, representative of the supervisor,

on Feb. 20, 1925 There were also present H. A. Gaddie, Superintendent
and Bert Whetstone, Driller

Casing Record 15 5/8" landed 150'; 12" cemented 483', w. 50'; 10" cemented 620', w. 50'; 8" liner
landed 2120', including 500' perforated on bottom, cut and pulled

The operations were performed for the purpose of (1) proposed from 1200' to about 1170'

(Casing record cont'd) from about 1600'
and the data and conclusions are as follows:

(B.) Gaddie

1. On February 18, 1925, the 10" casing was shot at 1500', 1400' and 1300', each time with a 4"x2', 80% gelatin shot. After each of the above shots, the casing could not be pulled.
2. On February 18, 1925, the 10" casing was shot in fluid at 1175' with a 4"x2', 80% gelatin shot.
3. The hole was cleaned out to 1175' and 15 sacks of Victor cement dumped at 1175', February 19, 1925.

(C) 1162'

(K) 1162'

File as memo

no log or other records are available. If log is filed then this notice should be written up.

R. D. BUSH,
State Oil and Gas Supervisor

By..... Deputy

WILSHIRE OIL PRODUCERS

July 24, 1926.

Well No. 2 and well No. 3, Sec. 28-1-14, Salt Lake.

Several letters were addressed to this company in an endeavor to obtain the log and history of these wells, which letters are filed with record of well No. 2.

Under date of Oct. 28, 1925, a letter was received from the company, which letter is on file with the well record of well No. 2, and which gives the following information regarding well No. 3:

--Well No. 3
43' clay
54' asphalt
97' to 500' shale and oil - no water.

100' 12" s.p. casing. No other pipe."

Apparently impossible to obtain the logs and histories of these wells on the proper forms. No further attempt will be made, therefore, to obtain same, and the records of the wells are closed.

E. Augustine
Deputy Supervisor.

CALIFORNIA STATE MINING BUREAU

DEPARTMENT OF PETROLEUM AND GAS

Report on Proposed Operations

No. P. 1-1718

Los Angeles

Dec. 7, 191-20

Mr. R. B. Taylor

Los Angeles Cal.

Agent for WILSHIRE OIL PRODUCERS

DEAR SIR:

Your proposal to commence drilling Well No. 2, Section 28 T. 1 S. R. 14 W., S.B. B. & M.,

Salt Lake Oil Field Los Angeles County, dated Nov. 29, 191-20

has been examined in conjunction with records filed in this office.

Present conditions as shown by the records and the proposal are as follows:

PROPOSAL:

The notice gives the following information and proposal:

LOCATION: 140 feet S. Wilshire Boulevard and 60 feet W. from East line of property.

ELEVATION: Not given.

ESTIMATED DEPTH TO OIL SAND: 1200 feet more or less.

PROPOSED CASING RECORD: "16" Stove pipe 30# casing landed at a depth of 60' 10" I. D. Screw 35# " cemented at a depth of 1200' to oil sands."

Recommendation:

On December 9, 1920, Mr. R. B. Taylor reported to this office that oil which rose to the surface was encountered at depths of 510' and 530' in your well No. 1, adjoining. Your proposal to drill is approved with the following provisions:

- 1. This department must be notified when oil or gas showings are encountered.
2. A decision as to the exact depth for shutting off water is deferred pending further information as to the depth to oil bearing formations.
3. Weekly drilling reports should be filed with this office as soon as drilling is commenced.

c.c. C. E. Hopkins

R. P. McLAUGHLIN,

State Oil and Gas Supervisor

By [Signature] Deputy

CALIFORNIA STATE MINING BUREAU

Department of Petroleum and Gas

STATE MINING BUREAU
RECEIVED
 NOV 30 1920
 LOS ANGELES OFFICE

037-14696

Notice of Intention to Drill New Well

This notice must be given before drilling begins

Los Angeles Cal. Nov. 29 19 20

Mr. Irvin V. Augur

Deputy State Oil and Gas Supervisor

Los Angeles Cal.

DEAR SIR:

In compliance with Section 17, Chapter 718, Statutes of 1915, notice is hereby given that it is our intention to commence the work of drilling well number 2 Section 28 T. 1-S. R. 14, W. S. B. & M., Salt Lake Oil Field, Los Angeles County.

The well is 140 feet N. or S., and 80 feet E. or W. from East line of property
 (Give location in distance from section corners or other corners of legal subdivision)

The elevation of the derrick floor above sea level is _____ feet.

We propose to use the following strings of casing either cementing or landing them as here indicated:

Size of Casing, Inches	Weight, Lbs. Per Foot	New or Second Hand	Depth	Landed or Cemented
16" Stove pipe	30#	new	60 ft.	landed
10" I.D. Screw	35#	second	1200 to oil	sands cement

It is understood that if changes in this plan become necessary we are to notify you if possible before cementing or landing the casing.

We estimate that productive oil or gas formation should be encountered at a depth of about 1200 feet, more or less.

Respectfully yours,

Dear Mr. De Vera:

The Department of Toxic Substances Control has received your letter to review records under the Public Records Act.

After a thorough review of our files we have found that no such records exist at this office pertaining to the sites/facilities referenced above.

We would like to inform you about EnviroStor, a database that provides information and documents on over 5,000 DTSC cleanup sites. EnviroStor can be accessed at: <http://www.envirostor.dtsc.ca.gov/public>. Also, a computer is available at each DTSC Regional File Room Office for use by community members to view EnviroStor.

If you have any questions or would like further information regarding your request, please contact me at (714) 484-5337.

Sincerely,

Julie Johnson

Environmental Professional**

CHRISTIANE MARIE TAMAYO

DUE DILIGENCE TEAM LEADER-SENIOR GEOLOGIST DESIGN AND CONSULTING SERVICES, L.A. METRO REGION

AREAS OF EXPERTISE

Phase I and II Environmental Site Assessment/Investigations
Permitting
Field Work Oversight (ex. Drilling and Soil Vapor Investigations)
Monitoring Well Installation, Groundwater Sampling, and Abandonment
Agency Correspondence
County, City File Reviews
Soil Sample Preparation & Logging

EDUCATION

BS, Geology, Occidental College
MS, Geology, California State University

LICENSES/REGISTRATIONS

AHERA Building Inspector, #CA01806-140202-10
Registered Environmental Assessor, CA, #30313

YEARS OF EXPERIENCE

With Firm	9.5
With Other Firms	2

PROFESSIONAL ASSOCIATIONS

N/A

TRAINING AND CERTIFICATIONS

40 hr HAZWOPER/8 hour refresher; CPR/Basic First Aid; AHERA Building Inspector
Cal-OSHA 40-hour Hazardous Waste Operations/Emergency Response
Cal-OSHA 8 Hour Health and Safety Officer

SUMMARY

Christiane graduated from Occidental College in May 2005 with her B.S. in Geology, and in 2010 from California State University, Los Angeles with her M.S. in Geology. Additionally, as of June 2011, Ms. Tamayo has fulfilled the requirements to attain her R.E.A. Certification.

With 11 years of experience in the field of environmental consulting, Christiane has worked on large retail projects from ExxonMobil's Global Remediation sector as well as several clients in the private sector.

Ms. Tamayo has experience conducting environmental investigations with URS/AECOM. She has worked on numerous projects performing Phase I Environmental Site Assessments and Phase II investigations (Hollow-stem and direct push drilling, soil vapor surveys, and stockpile/trench sampling). Ms. Tamayo also has a great deal of experience installing, sampling, and destroying groundwater monitoring wells. She has worked on a variety of properties including industrial, commercial, and retail. In her capacity, she manages projects, prepares reports, and works with various regulatory agencies including the Regional Water Quality Control Board, local fire departments, and the Department of Toxic Substances Control. A summary of past selected work experience is provided below. Ms. Tamayo also serves as the Due Diligence Group Leader, selling ESA services, communicating with clients, and serving as the face of the Practice.

EXPERIENCE

ExxonMobil Global Remediation Retail Projects, Los Angeles & Orange County, CA. Staff Geologist executing groundwater sampling, well installation (subsurface clearance, hole-clearing, soil sampling, logging, and drilling), well abandonment, corresponding reports, and associated permitting and agency correspondence.

Shell Project-Retail, Los Angeles County. Staff Geologist assisting with boring hole clearance, drilling & logging, and report writing.

Due Diligence, Northern & Southern California, Multiple Projects, City and County of Los Angeles, Cornerstone Real Estate Advisers LLC, Lincoln Property Company, Regency Centers, MetLife Real Estate Investments, Bixby Land Company, Pacific Harbor Line, and other private real estate investment/management firms. Team Lead and Senior Geologist selling ESA services, reviewing and assisting with Phase I site reconnaissance and report writing for projects and occasional Phase II soil investigations.

Caltrans Initial Site Assessment; Long Beach Freeway (I-710) Corridor, Los Angeles County, CA; Los Angeles County Metropolitan Transportation Authority (Metro) and Partner Agencies. Managed and conducted a California Department of Transportation (Caltrans) Initial Site

Assessment (ISA) for the properties associated with the proposed Long Beach Freeway (I-710) Corridor Project. The project involved 18 miles of I-710 between the Ports of Long Beach and Los Angeles and State Route 60 (SR-60). Objective of the ISA was to evaluate the potential for the presence of hazardous materials prior to design and construction within the proposed project right-of-way so that liability issues can be identified relating to site clean-up and construction impacts.

Playa Vista, CA, Lincoln Property Company, Various Projects. Field Geologist conducting subslab VOC monitoring, stockpile sampling, trench sampling, report preparation with submittal to the RWQCB-LAR, and Phase I reconnaissance for completed structures onsite.

Good Year Tire Corporation, Various locations throughout southern California, Phase II & Phase III investigations. Senior Geologist and task manager conducting direct-push drilling and soil sampling in areas of leaking hydraulic lifts, subsequent oversight of lift removal activities, and associated report writing.

Other Projects include:

Groundwater investigation for proposed commercial property transfer. Included installation of several monitoring wells for sampling to determine extent and source of chlorinated solvent contamination prior to the development of remedial alternatives.

Conducted field investigation of shallow soil conditions to evaluate possible historical presence of oil field or agricultural waste dump. Investigative activities involved sampling soil at discrete depths for laboratory analyses.

Soil Vapor Investigations related to vapor intrusion and vapor encroachment concerns as specified in ASTM-13 Standard; subsequent indoor air sampling and monitoring leading to the Health-Risk Assessments (HRAs).

Alexandria Wadsworth-Brice

Project Manager/ Environmental Scientist

Education

B.S. Environmental Science
2008/San Diego State University

Years of Experience

With AECOM 3

With Other Firms 5

Training and Certifications

OSHA HAZWOPER 40-hour training
OSHA HAZWOPER Supervisor
OSHA HAZWOPER 8-hour annual refresher training
OSHA 10 Hour Outreach Training
DOT Transportation of Hazardous Materials Certified
RCRA Hazardous Waste and Non-Hazardous Certification
Loss Prevention System
Smith Driver Training
IATA Dangerous Goods Transportation Certified
Hazardous Waste Classification by DTCS
Blood Borne Pathogen Training

Environmental Compliance

Mrs. Wadsworth-Brice has traveled throughout the southwest completing onsite compliance, reporting and system management for ExxonMobil Torrance Refinery, Conway Freight, Parsec Intermodal Railroad, Eagle Intermodal Railroad, LEGOLAND, aerospace manufacturing companies, medical manufacturing companies and private investment enterprises. The compliance reporting includes: Hazardous Materials Business Plans (HMBP), Storm Water Pollution Prevention Plans (SWPPP), and Spill Prevention, Control and Countermeasure (SPCC) plans. Ms. Brice completed monthly storm water compliance audits for the ExxonMobil Torrance Refinery, Parsec, Eagle and LEGOLAND facilities, which ensured that the Best Management Practices (BMPs) as listed in the compliance reporting were being utilized. She has also performed biannual storm water sampling, prepared and submitted annual storm water compliance reports.

In addition, Mrs. Wadsworth- Brice has conducted compliance document control and air sampling for remediation systems in accordance with the South Coast Air Quality Management District (SCAQMD) permit. She was a part of the team that completed the 2014 Chevron Air Emissions Reporting (AER). She has completed permitting, compliance evaluations and sampling for National Pollutants Discharge Elimination System (NPDES) for a large groundwater/SVE remediation system. In addition she has completed permitting and reporting for Industrial Wastewater Discharge Reports (WDR) industrial clients.

Mrs. Wadsworth-Brice has coordinated the removal and classification of soil waste from investigation and excavation events for ExxonMobil, The DOW Chemical Company, Sunbelt Investment Holdings LLC, Propel, Ashland Chemical, and various other clients. In addition, Ms. Brice has coordinated and classified water waste from large scale groundwater monitoring events, for Sunbelt Investment Holding LLC, The Dow Chemical Company, ExxonMobil, and Ashland Chemical. She is RCRA trained, DOT certified, and IATA certified for waste handling and classification procedures. She also has completed necessary regulatory reporting related to hazardous waste management, as required by the EPA and DTSC for the State of California including biannual reporting and the lead on four, SB-14 in the 2014 reporting years.

Experience

Due Diligence, California, Arizona Massachusetts and Oregon, Multiple Projects: Commonwealth Partners, MET Life, Nextel, Good Year, Sunbelt Investment Holding Company, Circle K and other various industrial, commercial and retail companies. (Task Lead)

Completed onsite environmental inspections, record review with corresponding Phase I reporting requirements.

Multi-Client throughout Southern California, (Project Manager/ Task Lead December 2009 - Current)

Provide comprehensive SWPPP compliance support compliant per the 2015 General Permit including storm water training, ascertaining current BMPs effectiveness, and SMARTS registration.

Interpret and evaluate laboratory analysis for permitted threshold parameters including Harbor Toxics, TMDL limitations, 303D listed water bodies and bacterial contamination.

Completed SWPPs and conducted monthly storm water compliance audits for various industrial facilities including railroads, theme parks, pharmaceutical, and aerospace companies to ensure that the Best Management Practices (BMPs) as listed in the compliance reporting were being utilized.

Lead storm water sampling teams and performed storm water sampling, prepared and submitted annual storm water compliance reports.

Hazardous Waste and Water Compliance Exxon Mobil Refinery, Torrance, CA. (Project Manager, December 2013 - Current)

Implemented site wide storm water program for a site specific industrial storm water permit, developed procedures, implemented BMPs, trained sampling contractors, and planned for logistics of sampling logistics refinery wide including extensive safety program. Created compliance inspections, verified and followed up on field reports.

Weekly onsite management and classification of hazardous, non-hazardous and recyclable waste, Quarterly and Annual reporting to City of Torrance, DTSC and the Regional Water Quality Control Board.

Completed the SB-14, biannual report, and created databases for SPCC compliance activities.

Enterprise Rent-a-Car, Southern California 22 Active Sites (Project Manager, August 2015 - Current)

Program manager for twenty-two active sites with a field staff of seven employees throughout Southern California. Provide on-going monthly auditing and compliance assistance for all environmental programs including waste handling, waste water, UST compliance, hazardous materials, underground storage tanks, air permits and other local and state permits. In addition, prepare and present environmental training programs on an annual basis.

SB-14 Source Reduction (Project Manager, Task Lead, January 2015 – July 2015)

Regional lead for the 2015 SB-14 reporting efforts, this included site visits reporting and oversight for 29 Palms Air Force Base, Exxon Mobil Torrance Refinery, Sony Pictures Studios, TA Aerospace, Kirkhill and L3 Communications.

Sagem Avionics Onsite Compliance Support (Task Lead, May 2014 - December 2014)

Assisted with development and ongoing improvement of the environmental management system (EMS) and headed programs supporting the EMS. Improved the existing EMS manual and associated procedures, training on these procedures and programs, and maintained and implemented regulatory programs to support ongoing compliance. Regulatory programs included storm water programs; air programs; new chemical reviews; hazardous, non-hazardous, and waste characterization, disposal, and transportation; regulatory plans and reporting (hazardous materials business plan (HMBP); storm water pollution prevention and monitoring plans, TRI reporting; and biennial reporting)

TA Aerospace Onsite Compliance Support (Project Manager, January 2014- Current)

Sampled and completed biannual wastewater discharge reports, updated the facility SWPPP for the new industrial permit, additionally provided compliance updates for the Spill Prevention, Control and Countermeasure (SPCC) plan, and the Hazardous Material Business Plans (HMBP).

Baxter Healthcare Onsite Compliance Support (Task Lead, August 2014 - February 2015)

Providing on-going environmental support, implementation of programs, and regulatory assistance. Projects consisted of improving and updating portions of the Environmental Management System including clean room procedures, hazardous waste handling and LQG compliance, waste profiling, new chemical reviews, air permitting and reporting, implementing training programs, and assisting with regulatory updates of existing environmental programs.

SUMMARY

Gareth graduated from Swansea University in May 2007 with his B.S. in Geography and in 2010 from California State University, Los Angeles with his M.A. in Geography.

Gareth has experience conducting environmental assessments of properties including Phase I and II Environmental Assessments, Transaction Screen Assessments, Desktop Reviews and Database Reviews. He has worked on a range of properties including industrial, commercial, and retail for a range of clients including financial institutions, public agencies and private companies. In his current role, he performs site visits, manages projects, prepares reports, and liaises with various regulatory agencies at the local, county, and state level including the Regional Water Quality Control Board and Department of Toxic Substances Control.

Mr. Howell also has experience performing energy benchmarking services for property owners using the United States Environmental Protection Agency online Energy Star Portfolio Manager.

EXPERIENCE

Due Diligence, Multiple Projects, for Financial Institutions, Public Agencies, and Private Companies in Southern California Project management of Phase I ESAs, TSAs and other environmental assessments at residential, commercial, and industrial properties located across Southern California

Industrial, Dry Cleaner and Gas Station Projects, Southern California. Phase I and II ESAs including soil and soil vapor studies at sites across Southern California. Sites include active and historical gas station and dry cleaner facilities, manufacturing and plating facilities, and Leaking Underground Storage Tank (LUST), Spills, Leaks, Investigation and Cleanup (SLIC), and National Priorities List (NPL) sites

Other projects include:

Preparing reports for property owners for compliance with California's Nonresidential Building Energy Use Disclosure program (AB1103)
