Preview of Upcoming Meeting Agendas

I. October Meeting: October 19, 2017, Thursday: Room 739, Hall of Administration, 10:00 am to 11:30 am

a. Review template for CCC Plans:
   i. Draft to be completed by February 28, 2018 for Board deputy review.
   ii. Finalized CCC plan by March 30, 2018 prior to Statewide April 2018 Census launch.

b. Elements of the Plan will minimally include:
   i. Participants such as:
      - County Departments and Board offices
      - 88 cities, Unincorporated Areas, California State Association of Counties, League of Cities, Councils of Government
      - Educational Institutions: School Districts, Public and Private Colleges
      - Business/Chambers
      - Advocacy Groups, Community-Based Organizations and Religious Organizations
      - Foundations
   ii. CCC Strategies for Education and Outreach for HTS Populations in Los Angeles County based on mapped Census Bureau variables
   iii. Timeline/Schedule
   iv. Other Plan Components as outlined in the template.

II. November Meeting: November 30, 2017, Wednesday, Room 743, Hall of Administration, 9:30 am to 11:00 am

a. Select maps of County LRS Areas

b. Demo of How You Can Use the LRS Viewer to Identify the HTS Populations and LRS in Los Angeles County – Presenter: Regional Planning

c. Potential additional map layers, e.g. County Health, Public Health, Mental Health and Social Service Facilities, job/resource centers, etc.
Roadmap to Complete 2020 Census Count
The Power Of Census Data

Congressional representation, reapportionment and redistricting.

Federal funding of approximately $600 Billion annually nationwide.

Over $76 Billion (\$1,958 Per Capita) in Federal funding for California each year for health, social services, nutrition, housing, education, and highways.
What’s New?...

- 50% reduction in field staff and enumerators
- Use of technology including:
  - GIS and aerial imagery to validate 11 million addresses with plans to visit only 25% of the blocks nationwide.
  - The Internet as the primary response mode to fill out and submit Census forms.
  - Administrative and third party data to validate respondent addresses and guide non-response follow-up.

California has 10 of the top 50 Hard-to-Survey Counties in the nation, including the number 1 Hardest-To-Survey:

Los Angeles County
Federal Funding to California

California receives $76 Billion dollars annually in Federal funding. The top Federal Departments with funding sources that support L.A. County programs based on Census driven data are:

- Health and Human Services: Health/Medical-related services, Foster Care, Head Start
- Housing and Urban Development: Section 8 Housing
- Agriculture Department: Nutrition Programs
- Labor Department: Workforce Development Programs
- Transportation Department: Highway, Planning and Construction

L. A. County’s Role in the 2020 Census
Board Adopted Motion (March 14, 2017)

L.A. County’s 2020 Census Planning Committee:

1) Ensure that County boundaries, addresses, and population data are updated. L.A. County will provide the U.S. Census Bureau with a Local Update of Census Addresses (LUCA).

2) Develop the framework and plan for L.A. County’s 2020 Census education and outreach strategy focusing on hard-to-count populations. Complete Count Committees (CCC) will launch the County’s effort.

LUCA (Local Update of Census Addresses)

The Census Bureau relies on a complete and accurate address list to reach all residents for inclusion in the Census. LUCA is the only opportunity offered to State, local and tribal governments to review and comment on the Census Bureau’s residential address list prior to the 2020 Census.

The 88 cities within the County must decide if they will register in the LUCA program or rely on L.A. County to process their LUCA data. L.A. County LUCA contacts are from the Internal Services Department:

- Alexander Ruiz: aruzizisd.lacounty.gov
- Victor Chen: vchenizisd.lacounty.gov
L. A. County
Complete Count Committees (CCC)

To successfully connect with HTS populations, a Countywide, coordinated outreach plan is needed. Based on top Federal funding allocations to L.A. County and its regional responsibility for the Census, the CCC's are:

1. Human Services CCC
2. Transportation CCC
3. Countywide Outreach CCC

Reaching Hard-to-Survey (HTS) Populations

16 variables identified by the Census Bureau characterize socio-economic and demographic profiles of communities that enables identification of Hard-to-Survey populations.

Based on these variables, a mapping tool was developed that indicates which Census tracts within L.A. County are HTS. This will support a targeted outreach plan.

Census Planning Database Variables

Provides socio-economic and demographic characteristic profiles of communities to enable identification of Hard-to-Survey populations.

Thank You
How will your Department be involved in the 2020 Census?
Board Motion on Census 2020
Census 2020 Planning Committee and Complete Count Committee

An accurate decennial Census is extremely critical to California, to ensure fair political representation and equitable receipt of federal funds. Population counts determine which states gain or lose representation in Congress and also determine the federal funding allocations to communities. To achieve an accurate assessment of the population living within the nation's borders, the U.S. Constitution mandates a census of the nation's population every 10 years.

The goal of the 2020 Census for Los Angeles County is to count all residents. The data obtained from the Census can help shape policy and funding decisions for health care, social services, transportation, workforce development and other critical needs. In Fiscal Year 2014-15, the County's departments expended $2.12 billion, received from the top five largest distributing federal departments including Health and Human Services, Agriculture, Education, Labor, and Transportation, on federal grant programs that use population and/or income data as a factor. It is of utmost importance that the County ensures that all its residents are counted so that it receives a fair allocation of resources to meet our public service needs and priorities.

The County of Los Angeles, the U.S. Census Bureau, and cities in the County have a longstanding partnership in improving the accuracy of the Census count. The Board initiated this effort for the 2020 Census with its approval of the Joint Statistical Agreement on September 29, 2016 that allows data sharing between the County and the Census Bureau. The key to improve the Census count is to embark on an early systematic approach for identifying the County's population and developing education
and outreach plans for all communities, and particularly those Hard-to-Survey Populations in the County.

A County of Los Angeles Census 2020 Planning Committee (Planning Committee) comprised of County departments responsible for updating County jurisdictional boundaries, addresses and population data, and familiar with education and outreach strategies, is the first step in launching this Countywide effort. The Planning Committee will develop a framework for the County’s Census 2020 Complete Count Committee (CCC) which will be responsible for launching a comprehensive Countywide Census education and outreach campaign. The CCC will include representatives from Board Offices and County departments to work in partnership with federal and State agencies, as well as local jurisdictions, community-based organizations, and other local entities to ensure the County’s Census goals are achieved.

I, THEREFORE, MOVE that the Board of Supervisors take the following actions as further preparation for the April 1, 2020 Census Day:

1. Instruct the Chief Executive Officer to initiate a County of Los Angeles 2020 Census Planning Committee to update County jurisdictional boundaries, addresses and population data, and develop an education and outreach strategy with a particular focus on Hard-to-Survey Populations. The Planning Committee shall include representatives from: Regional Planning, Public Works, Internal Services, the Health Agency, Registrar-Recorder/County Clerk, the Assessor, Parks and Recreation, Public Library, Public Social Services, Children and Family Services, and any other County departments or agencies determined as necessary by the Planning Committee.

2. Instruct the Planning Committee, upon completion of an overarching Countywide education and outreach strategy, to form a Complete Count Committee (CCC)
and identify appropriate subcommittees as may be necessary to ensure a successful Census 2020 campaign Countywide.

3. Instruct County departments to participate in the Planning Committee and CCC, wherever appropriate, and as requested by the Chief Executive Officer, including designation of a departmental representative to participate on the Planning Committee and/or the CCC.

HLS
Census "Best Practices"
Best Practices for Los Angeles County for Census 2020

1. Make Census a Priority – treat it as an opportunity to receive the County's fair share of funding.

2. Start Early – provide adequate time for Census education and outreach efforts.

3. Invest adequate funding for Census education and outreach efforts.

4. Build a Diverse Staff – dedicate a diverse, multi-talented, multilingual staff for Census education and outreach efforts.

5. Collaborate with the Census Bureau as much as possible – start early in the process.

6. Coordinate with Partners regional and local governments, elected officials, educational institutions including, K-12 schools, higher education and early education programs (ages 0-5), private businesses and corporations, foundations and non-profits, unions, faith-based organizations, disabled communities, and homeless communities.

7. Engage cities and County departments – provide clear directions to departments to create buy-in. Direction should come from the BOS to establish expectations. Collaborate with cities and provide outreach.

8. Support Hard to Survey (HTS) Populations. Utilize the Low Response Score tools in the Census Bureau's Planning Database to identify HTS areas and customize education and outreach programs to reach these populations.

9. Create Dynamic Education and Outreach Tools - create technology and face-to-face options for reaching target audiences:
   a. County-wide (with departments)
   b. With community organizations
   c. Involving multi-lingual participants on the CCCs.

10. Develop a Comprehensive Education and Outreach Plan to include:
    a. Community meetings, flyers, radio spots, TV spots (should be community based); bus bench advertisements, workshops to help people complete forms;
    b. Engage trusted messengers and community leaders;
    c. Use targeted media outreach; and
    d. Focus on sector outreach to unions, corporations, early education programs (0-5 years), faith-based organizations, disabled communities, homeless communities, park patrons, library patrons, and health and social service clients.

11. Research 2010 Census Analyses: Review analyses done by third-party think-tanks or academics on the impacts of 2010 as it will be vital information for Census 2020.

---

1 "The return on a Census outreach investment is significant, as counting more people directly correlates to more federal funding for California." (Source: Booklet - California Complete Count/Counting 2010 and Planning for 2020.)
Local Update of Census Addresses
The 2020 Census Local Update of Census Addresses Operation (LUCA)

What is LUCA?

LUCA is the only opportunity offered to tribal, state, and local governments to review and comment on the U.S. Census Bureau's residential address list for their jurisdiction prior to the 2020 Census. The Census Bureau relies on a complete and accurate address list to reach every living quarters and associated population for inclusion in the census.

Why participate in LUCA?

- To help ensure an accurate decennial census count in your community.
- To help the federal government distribute more than $400 billion in funds annually for infrastructure, programs, and services.
- To help your community plan for future needs.

Who can participate in LUCA?

Active, functioning, legal governments can participate in LUCA. These include:

- Federally recognized tribes with a reservation and/or off-reservation trust lands.
- States.
- Counties.
- Cities (incorporated places).
- Townships (minor civil divisions).

If you are unable to participate in LUCA, you may designate an alternate reviewer for your government, such as your county, state data center, or regional planning agency.

Schedule

- January 2017: Advance notification of LUCA mailed to the highest elected official (HEO) or Tribal Chairperson (TC) of all eligible governments and other LUCA contacts.
- March 2017: LUCA promotional workshops begin.
- July 2017: Invitation letter and registration forms mailed to the HEO or TC of all eligible governments.
- October 2017: Training workshops begin. Self-training aids and Webinars will be available online at the LUCA Web site.
- February 2018: Participation materials mailed to registered participants. Participants have 120 calendar days from the receipt of materials to complete their review.
- August 2019: Feedback materials offered to participants with the results of Address Canvassing.
- April 1, 2020: Census Day.

For more information about LUCA, call 1-844-344-0169, e-mail us at <GEO.2020.LUCA@census.gov>, or visit our Web site at <www.census.gov/geo/partnerships/luca.html>.
LUCA Materials

The Geographic Update Partnership Software (CUPS) is new for LUCA. The CUPS is a self-contained Geographic Information System (GIS) update and processing package. In addition to the software, you will receive the Census Bureau's address list, address count list by census block, and Topologically Integrated Geographic Encoding and Referencing (TIGER) partnership shapefiles.

The Census Bureau offers its address list in digital or paper formats. The digital format requires the use of spreadsheet or database software. The paper format is available only to governments with 6,000 or fewer addresses.

Maps are offered in digital (TIGER partnership shapefiles that require GIS software) or paper (large format maps are 42 X 36 inches and include a DVD of small format [8.5 X 14 inches] block maps in Adobe PDF) formats.

The Census Bureau offers in-person training using LUCA materials. Self-training aids and Webinars are available online at the LUCA Web site.

What's new for LUCA?

- Pre-LUCA activities provide more opportunities to submit address information and receive feedback through the continuous Geographic Support System (GSS) Program.
- Streamlined participation through the Full Address List Review provides the opportunity to review and update the Census Bureau's address list.
- The Census Bureau's digital address list is available in new, convenient standard software formats.
- Comprehensive data that includes ungeocoded address and residential structure coordinates.

Preparing for LUCA

You will receive only the addresses within your jurisdiction's boundaries that are currently on file with the Census Bureau. By participating in the 2017 Boundary and Annexation Survey (BAS), you have the opportunity to verify or update your jurisdiction's boundaries. Doing this will ensure that you receive the complete list of addresses for your jurisdiction in LUCA.

To prepare your address list before you receive your LUCA materials:

- Ensure that your address list contains multiunit structure identifiers (such as apartment numbers for individual units) and that you can distinguish between residential addresses and nonresidential addresses.
- Identify local address sources, such as building permits, E-911 address files, local utility records, annexation records, and assessment or taxation files.
- Visit the LUCA Web site or plan to attend a LUCA promotional workshop to get more information about participating in the program.

Notes and Findings:

- The **Counting for Dollars Project** will identify all federal financial assistance programs relying Decennial Census-derived data to guide the geographic distribution of funds.
- As an initial product, the project is publishing tables on the distribution, by state, of FY2015 funds from 16 large Census-guided programs.
- For every program but the National School Lunch Program, the equitable distribution of funds to a state depends on the accurate measurement of its population count and characteristics.
- There is not a straight linear relationship between state population count and federal funds flow. The per capita figure allows cross-state comparisons of fiscal reliance on census-guided programs. *It does not indicate the amount by which federal funding increases for each additional person counted.* (See The Leadership Conference Education Fund, “**Counting for Dollars: Why It Matters.**”)

Definitions:

- Census-derived statistics — federal datasets that are extensions of or otherwise rely on the Decennial Census (list available on [project website](#))
- Census-guided financial assistance programs — programs that rely on Census-derived statistics to determine program eligibility and/or allocate funds to states and localities
- Per capita — total FY2015 obligations for the 16 programs divided by population as of July 1, 2015 (per the Census Bureau)

Abbreviations:

- CFDA — Catalog of Federal Domestic Assistance
- USDA — U.S. Department of Agriculture
- ED — U.S. Department of Education
- HHS — U.S. Department of Health and Human Services
- HUD — U.S. Department of Housing and Urban Development
- DOT — U.S. Department of Transportation

Census Questionnaire Process
Background of the 2020 Census Questionnaire Process

On April 1, 2016, the Census Bureau (Bureau) conducted a 2016 Census Test in Harris County, Texas and Los Angeles County (Supervisorial Districts 1 and 5, map attached), covering 225,000 households. The purpose of the testing was to: (1) refine the Census process through the use of technology; (2) encourage Self-Response; and (3) manage the Non-Response Follow-up. The Bureau indicated that the move toward technology is to: (1) securely collect information; (2) conserve natural resources; (3) save taxpayer money; and (4) process data more efficiently.

Has the Census Bureau made any Changes to their Process for Issuing the Census Questionnaire?

Yes. For the first time, the Bureau will be shifting from paper questionnaires to the Internet as the primary response mode to the Census, thus reducing the amount of paper printing and distribution required, as compared to 2010. The Bureaus' goal is that 55% of the U.S population will respond online using computers, mobile phones or other devices.*

"The only households receiving paper forms under the Bureau’s plan would be those in neighborhoods with low internet usage and large older-adult populations, as well as those that do not respond online."*

Is the Internet the only Method for Respondents?

No. Respondents will have multiple modes for submitting responses to the Bureau Questionnaire: internet, paper; or telephone as follows:

- The Bureau will create awareness for and send contact materials to the respondents, directing them to the online questionnaire or to a paper questionnaire.

- The respondents that do not respond on the Internet will be given the opportunity to respond via Paper Data Capture.

- Some respondents will call with questions, and the Bureau will offer to collect their response via the telephone through Questionnaire Assistance Centers (QACs). The QACs are physical locations in the County/communities which the Bureau operates to provide assistance to respondents in completing their forms.

- Addresses for which the Bureau did not receive a response will be sent to the Bureau’s Non-Response Follow-up operation to determine the most cost-effective way of enumerating those households (personal visit, use of administrative records and third-party data, proxy responses, or imputation).
How will the Bureau Optimize Self Response?*

Communication and contact strategies will encourage the use of the Internet as the primary response mode through a sequence of invitations and postcard mailings. A key to optimizing Self-Response is to make it easy for people to respond from any location at any time. This is done in several ways:

1. Enabling people to respond via multiple modes (Internet, paper, or telephone if they call the QACs).

2. Allowing respondents to submit a questionnaire without a unique identification code.

3. Providing on-line forms in multiple languages.

Will the Bureau Verify the Mailing List/Addresses*

Yes. In the past, Census-takers have walked all 11 million blocks in the country to compile the mailing list. For the 2020 Census, the Bureau plans to verify all addresses, but instead of walking all physical addresses, they plan to walk 25% of the blocks nationwide and verify the remaining from digital imagery and other sources. Per the Pew Research Group, "The Bureau plans to incorporate technology from start to finish of the 2020 Census. As the census gears up, technology will help the Bureau compile its list of mailing addresses, which is the backbone of every Census.

16 Low Response Score Variables for the Hard to Survey Populations
The U.S. Census Bureau’s LRS Viewer application was developed to make the hard-to-survey areas easier to identify and to provide a socioeconomic and demographic characteristic profile of these areas using American Community Survey (ACS) estimates available in the Planning Database. The following variables use data from the 2010-2014 ACS 5-year estimates. The viewer can be found at: https://storymaps.geo.census.gov/arcgis/apps/webappviewer/index.html?id=76944f3553744500bb9b90288574e0ca.

Census Complete Count Committees
Formation of the Los Angeles County Complete County Committees (CCC) and the Education and Outreach Campaigns that these CCCs will develop are driven by two factors:

- The need to secure Federal Funding for essential Countywide programs that will serve our constituents for the next 10 years; and
- The fact that Los Angeles County is the Hardest-to-Survey (HTS) County in the Nation!

Federal Funding

The Chief Executive Office is currently working with County departments to determine the primary County of Los Angeles (County) funding sources driven by census-derived statistics. Preliminary information indicates the following Federal Departments allocation funding order:

- Health and Human Services Department: Estimated that over 80% of total County Federal funds driven by census-derived statistics are derived from this department.
- Agriculture Department: Primarily Nutrition Programs
- Housing and Urban Development: Primarily Section 8 Housing funding
- Labor Department: Primarily Workforce Development Programs
- Transportation Department: Primarily Highway Construction

Hard-to-Survey Populations

- The Census Bureau has identified 16 Census Planning Database Variables that provide socio-economic and demographic characteristic profiles of communities to enable identification of Hard-to-Survey Populations.
- Many of the residents that benefit from health and social services, nutrition programs, job programs and housing programs are also HTS populations. All residents rely on the County and its municipalities to provide a robust transportation system.
- Reaching the HTS populations will require a Countywide coordinated public/private education and outreach effort.
- The CCCs have been provided a mapping tool that will enable them to target their outreach efforts based on the database variable characteristics identified in the County’s individual census tracts.
Los Angeles County Complete Count Committees

Based on Federal funding allocations and the County's regionwide responsibility for the 2020 Census focused on targeting LRS areas throughout the County, the designated CCCs are as follows:

a. Human Services CCC: includes Health, Social Services, Jobs, and Housing

\textit{Co-Leads: Health Agency, Public Social Services (DPSS) and Children and Family Services (DCFS)}

- Other Participants: Workforce Development, Aging and Community Services (WDACS), Chief Executive Office (CEO) – Homeless Initiative, Community Development Commission (CDC) and other governmental and public/private stakeholders

- CEO-Unincorporated Area Services (UAS) Contact: Jason Tajima and Angela Gentry

b. Transportation CCC

\textit{Lead: Public Works}

- Other Participants: Regional Planning, Non-County Government Agencies, e.g. cities, COGS, Metropolitan Transit Authority, and other public/private and governmental stakeholders

- CEO-UAS Contact: Susana Graether

c. Countywide Outreach CCC: Coordinating County Department and Regionwide Education and Outreach

\textit{Lead: CEO/Public Information Office}

- Other Participants: Registrar-Record/County Clerk, Public Library, Parks and Recreation, Fire and Sheriff, City of Los Angeles, and other public/private and governmental stakeholders

- CEO-UAS Contact: Tina Herzog
