

## Revolutionizing Mobility Trends in LA

William Kehoe Chief Information Officer for Los Angeles County presented to the Board of Supervisors on March 5, 2019, highlighting one of our high priority goals in the County’s Enterprise IT Strategic Plan surrounding mobility. He expressed our excitement to support Los Angeles County’s move into Mobility and create, “a dynamic forward-looking workplace that employees can go where it doesn’t feel or have that culture of static workplace we traditionally have...”

### Benefits of Mobility

- Telework Opportunities
- Boost Workplace Agility
- Increases Employee Morale
- Increased Employee Availability
- Real-Time Data Capture
- Enhanced Communication

“I was given the opportunity to understand the benefits of mobility first-hand when I volunteered for the Woolsey Fire Disaster Support Center without missing out on any deliverables or meetings thanks to my mobility options, such as my laptop and Skype.” Sylvia Boyadzhyan (CIO Communication Manager)

## LA County CIO’s Teaming Up!

The 2019 Digital Counties Survey was released and the LA County Office of the Chief Information Officer (OCIO) is leading the effort to have LA County be recognized as a top Digital County in the Country.

Utilizing mobile opportunities, such as Skype meetings and Microsoft Teams with upgraded items like laptops, tablets, and smartphones has heightened the engagement level of preoccupied CIO’s from various departments. This upgrade in our mobility stance in LA County has created a simple straight-forward approach for all collaborative efforts.

Being able to connect with various department CIO’s so easily has made recording and highlighting this year’s Countywide technological advancements a breeze.

## Goodbyes & Hellos at OCIO

“The best part of life’s journey... is who you get to share it with”. Thank you OCIO for being part of my journey. I will miss you all!!  
– Laura Curry

“I am excited to be part of the team to breakdown the barriers between departments and make a meaningful change to how data contributes to decision-making and betterment of LA County residents.” – Chun Liu
