

LA County Won 2nd Place in 2019 Digital County Survey

“LA County rises up the large county ranks to #2 in the Government Technology Digital County survey after a 4th place finish in 2018 highlighting great vision, strategy, innovation and leadership in using technology to transform government services – Congratulations to all!
- William Kehoe, OCIO Chief Information Officer

This year’s win is a testimony to the IT leadership from all the County departments, their commitment, leadership, innovation, hard work and partnership with the business leaders in using technology to transform the services we provide to the residents of LA County.

William Kehoe @ Data & Donuts

William Kehoe had the opportunity to present at the monthly "Data & Donuts". He highlighted how data is the enabler, the differentiator, between a great organization and a stagnant one in both the public & private sectors.

He also discussed how we need to prioritize data use, data integration, and data sharing in LA County. We have 37 departments and we need to start structuring our data horizontally to reach all the departments appropriately. One of our Countywide Strategic goals is ‘Data as A Utility’ and this will help us create free flowing and accessible data, this is our vision and that is exactly where we need to start!

LA County’s March of Dimes Fundraiser at Dodgers Stadium!

On June 22nd the LA Dodgers hosted LA County’s March of Dimes Fundraiser. CEO, Sachi A. Hamai threw the first pitch to our CIO catcher, Bill Kehoe.

Everyone enjoyed the first pitch followed by the LA Dodgers win against the Colorado Rockies.
