

## Digital Summit & Awards

The Office of the CIO had a significant leadership role at this year's 2019 Los Angeles Digital Gov't Summit. We were excited to be able to present about mobility and our strategic goals, put design thinking into practice, as well as participate in a panel about 'Getting the Most out of your Data', and helping lead a cybersecurity tabletop presentation!

## OCIO Summer Move!

"The OCIO is joining the ranks of Google, Microsoft, and other Tech firms and moving to an open concept office space within the newly remodeled 7<sup>th</sup> floor of the Los Angeles County Hall of Records Building in #DTLA. It is a great opportunity to model our #mobility IT strategic goal while increasing the #collaboration and #productivity of our high-performance teams." – Bill Kehoe

"OCIO is moving to the Hall of Records – right across from the Civic Center/Grand Park metro stop! The new location is much more accessible for staff who take the Metro – or who want to start!" – Rachel Bryant

"Challenge, Change, Courage, and Life - "When we least expect it, life sets us a challenge to test our courage and willingness to change, change is always good, embrace it!!" - Patricia Almaguer

## Saying Goodbye

Office of the CIO is sad to say **goodbye** to our Deputy Chief Information Security Officer Erick Weber but wish him the best of luck on the next chapter in his life!

## Business Process Mapping Workshop

The Employment and Homelessness Taskforce (EHT) was launched by Chief Executive Office (CEO) Homeless Initiative to align the homeless, public benefits, and workforce systems to better meet the needs of homeless job seekers, starting with two regional clusters as pilots prior to broader County implementation. Irene Vidyanti and Ricardo Basurto-Davila from Analytical Center of Excellence (ACE), in partnership with Corporation for Supportive Housing, are developing business process maps of homeless job-seeker client flows within and between each and these three systems for these two regional clusters. The resulting process maps will be used to assess where employment linkages could be formed, improved, or prioritized to improve job placement outcomes.
