

2019 National Cybersecurity Awareness Event

The Office of the CIO (OCIO) Security Team kicked off Cybersecurity month by participating in the annual LA County National Cybersecurity Awareness Event. Our very own Chief Information Security Officer, Ralph Johnson was the keynote speaker for the event and Deputy Chief Information Security Officer, Jeffrey Aguilar presented on Social Engineering. Other topics included Data protection with County Chief Privacy Officer Lillian Russell and several other County leaders.

New To OCIO!

Just a few weeks ago, 15 FUSE executive fellows embarked on a yearlong journey to help government agencies across the country tackle today's greatest urban issues, from criminal justice reform to immigration policy. The OCIO is very excited to introduce Frances Arricale to our team, "As a FUSE executive fellow, I am fortunate to have the opportunity to contribute my career experience to serving the public interest in LA County. Working in the innovative OCIO, I am part of a dedicated team focused on propelling expert and impactful data-analysis practices in government decision-making to support the provision of vital services to the residents of the county."

Cybersecurity Tips

"The OCIO security team is making a dramatic impact in improving the security posture of LA County. Updated policies, security awareness training, department security assessments, contract review, and security advisory services to departments are a few of the areas that the team is responsible for."

William Kehoe

"Lock workstations when leaving your desk. Press Windows key + L"

Ralph Johnson

Personally, Identifiable Information (PII) is an individual's first name or first initial and last name in combination with either a social security number, driver's license number, account number with security code or access code, or medical/insurance information. Please ensure safeguards are in place if being handled.

Chris Paltao

"Practice Safe Clicking. Always be careful when clicking on attachments or links in emails. If it's unexpected or suspicious for any reason, don't click on it."

Jeff Aguilar
